### OROMIA REGION - KEY FINDINGS

#### LOCATION AND CAUSE OF DISPLACEMENT:

772,242 displaced individuals comprising 124,982 households in 369 displacement sites were identified in Oromia region\*. These figures represent an increase of 242,532 in the total individuals (46%), an increase of 53% in households and 77% in sites since round 7 (August/September 2017). 79% sites opened in 2017. Conflict was the primary cause of displacement for an estimated 73% of the displaced population.

**DEMOGRAPHICS:** 50% of displaced individuals were female and 50% were male. 61% were younger than 18 years old. 6% were over 60 years old.

**SHELTER:** 70 (18%) sites reported that over 50% of households were living in shelters that were below standard.

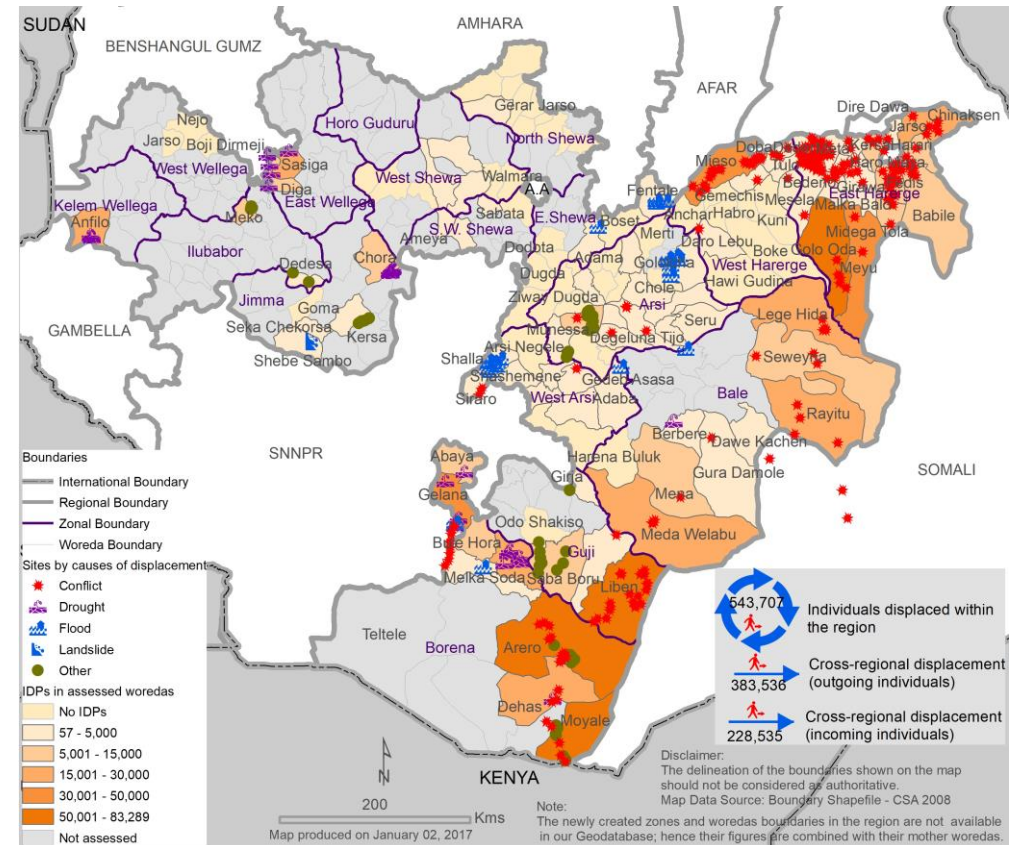

**WASH:** Only 28 sites meet SPHERE standards of access to over 15 liters of water per person per day. 219 (59%) displacement sites reported having no toilets.

**FOOD, NUTRITION AND LIVELIHOODS:** 101 (27%) sites, representing 405,414 individuals, reported no access to food. 65% of sites reported that IDPs did not have access to income generating activities

**HEALTH:** Pneumonia was the primary health concern in this round of data collection with 116 sites reporting this.

**EDUCATION:** In 52% of sites (194) less than 50% of children are attending school. Formal primary school education is available at 52% (300) of sites. Alternative basic education (ABE) is available at 8% (31) sites.

\* 36 sites were inaccessible during round 8 data collection. Data from earlier assessments has been combined with round 8 data to provide the last known status of these inaccessible sites.

**PROTECTION:** Harmful traditional practices were reported across some sites. These practices included: female genital mutilation and child marriage.

**COMMUNICATION:** 44% of sites reported that local leaders were primary source of information followed by site managers 31%.

# DISPLACEMENT TRACKING MATRIX (DTM) OROMIA REGION

ROUND 8: NOVEMBER - DECEMBER 2017

## LOCATION, ORIGIN AND CAUSE OF DISPLACEMENT

- At 273 of the 369 sites new IDP arrivals were recorded in 2017. At the remaining 96 sites no new IDPs had arrived in 2017.
- 79% of all sites identified opened between January and December 2017. 13% opened in 2016 and 8% opened before 2016.
- Figure 1 shows the estimated number of IDPs by assessment round and cause of displacement. Figure 2 shows the number of IDPs displaced by zone and cause of displacement. Figure 3 shows the drivers of displacement disaggregated by the number

- of IDPs in sites reporting new arrivals in 2017.
- 70% of IDPs in Oromia region are internally displaced within the region, while 30% are displaced from Somali region in to Oromia.
- Of the IDPs displaced within Oromia region, 45% were displaced within their zone of origin.
- 116 sites (31%) reported that IDPs had been previously displaced.

Figure 1: Estimated IDPs in identified sites by assessment round and cause of displacement

Figure 2: Estimated IDPs displaced by zone and cause of displacement

Drivers	Total Recorded Population	Percentage of Total Population	Population in Sites Reporting New Arrivals in 2017, Where Sites Opened in 2017.	Percentage of Total Population	Population in Sites Reporting New Arrivals in 2017, Where Sites Opened Before 2017	Percentage of Total Population
Conflict	561,346	73%	447,013	58%	47,052	6%
Drought	111,936	14%	12,644	2%	44,377	6%
Flood	14,998	2%	9,953	1%	-	-
Other	83,962	11%	50,041	6%	20,145	3%

# DISPLACEMENT TRACKING MATRIX (DTM) OROMIA REGION

ROUND 8: NOVEMBER - DECEMBER 2017

- IDPs from 8 (2%) sites were leaving the site. Of these, IDPs from 6 sites were going to the nearest village and IDPs from 2 sites intended to stay close to the displacement site.
- At 49% of sites IDPs foresaw a resolution to their displacement, while IDPs at 37% of sites did not. At the remaining 14% of sites key informants either did not know, or were not asked the question in a previous round.
- At 50% of sites IDPs prefer reintegration as a durable solution to their displacement while 28% prefer relocation.
- Figure 3 shows the percentage of sites reporting various obstacles to returns, while figure 4 shows support IDPs need to return or reintegrate.

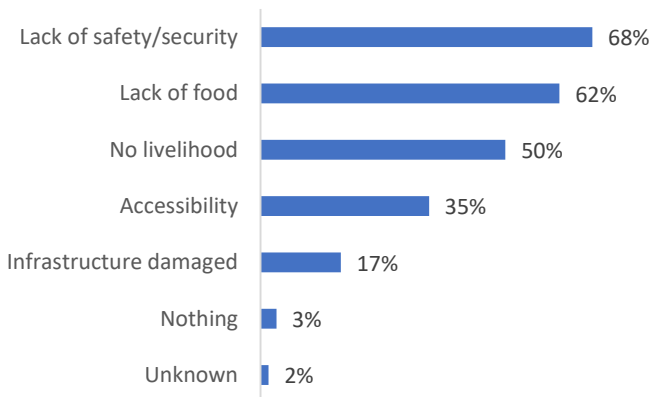

Figure 3: % of sites reporting obstacles to return

Figure 4: % of sites by support needed for return or reintegration

## POPULATION DEMOGRAPHICS

- Of the 772,242 displaced individuals identified in Oromia region, 50% were female and 50% were male. 61% were younger than 18 years old. 6% were over 60 years old (figure 5). Individuals with specific vulnerabilities were also reported at displacement sites and are represented in figure 6.

Figure 5: Gender and age distribution

Special vulnerabilities	# Individuals
Pregnant girls under 18	308
Pregnant women over 18	9,518
Breastfeeding mothers	16,253
Persons with disabilities under 18	629
Persons with disabilities over 18	872
Persons with chronic diseases	956
Members of religious minorities	1,099
Members of ethnic minorities	192
Elderly persons without caregivers	14,872
Unaccompanied children	233
Separated children	124
Orphaned children	190
Single female headed households	8,090
Single male headed households	2,182
Single child headed households	17
Elderly headed households	6,918

# DISPLACEMENT TRACKING MATRIX (DTM) OROMIA REGION

ROUND 8: NOVEMBER – DECEMBER 2017

## ABOUT DTM

### DTM GLOBAL

The Displacement Tracking Matrix (DTM) is a system to track and monitor displacement and population mobility. It is designed to regularly and systematically capture, process and disseminate information to provide a better understanding of the movements and evolving needs of displaced populations, whether on site or en route. More information is available at [www.globaldtm.info](http://www.globaldtm.info).

### DTM IN ETHIOPIA

In Ethiopia, data is collected at zone, woreda and site level. Since September 2016, eight rounds of assessments have been completed. The DTM programme is implemented in close collaboration with the National Disaster Risk Management Commission, regional, zonal and woreda counterparts and DTM implementing partners: the Danish Refugee Council (DRC).

### METHODOLOGY

IOM's DTM team composed of enumerators from IOM and DRC were deployed across the country to collect the data. The process involved the following steps:

**Zone level:** Interviews with key informants from the Disaster Prevention and Preparedness

Office (DPPO), community representatives, and the education and health offices collect information including (among others) estimated caseload of displaced population, identification of woredas within the zone that host displaced populations, reason for displacement, time of arrival of IDPs and location of origin.

**Woreda level:** Information is collected from key woreda informants and includes (among others) estimated length of stay, number of displaced households and individuals at woreda level, displaced population by type of temporary settlements and approximate locations of identifiable displacement sites. The information is used to plan site assessments.

**Site assessments:** In-depth IDP site assessments capture detailed information through key informant interviews, direct observation and focus group discussions with male, female, elderly, children and IDP representatives. Data on available services by sector, accessibility constraints, exact type, location and name of the site, place of origin of IDPs, estimated size and type of the site and most common type of shelter are captured. Age and gender disaggregation for the site is extrapolated using a demographic calculator tool based on the age range and sex of the

household members of 20 randomly selected households from the site.

**Disclaimer:** Age and gender disaggregation for the site is extrapolated using a demographic calculator tool based on the age range and sex of the household members of 20 randomly selected households from the site.

**Displacement Tracking Matrix (DTM) conducted in collaboration with Danish Refugee Council (DRC)**

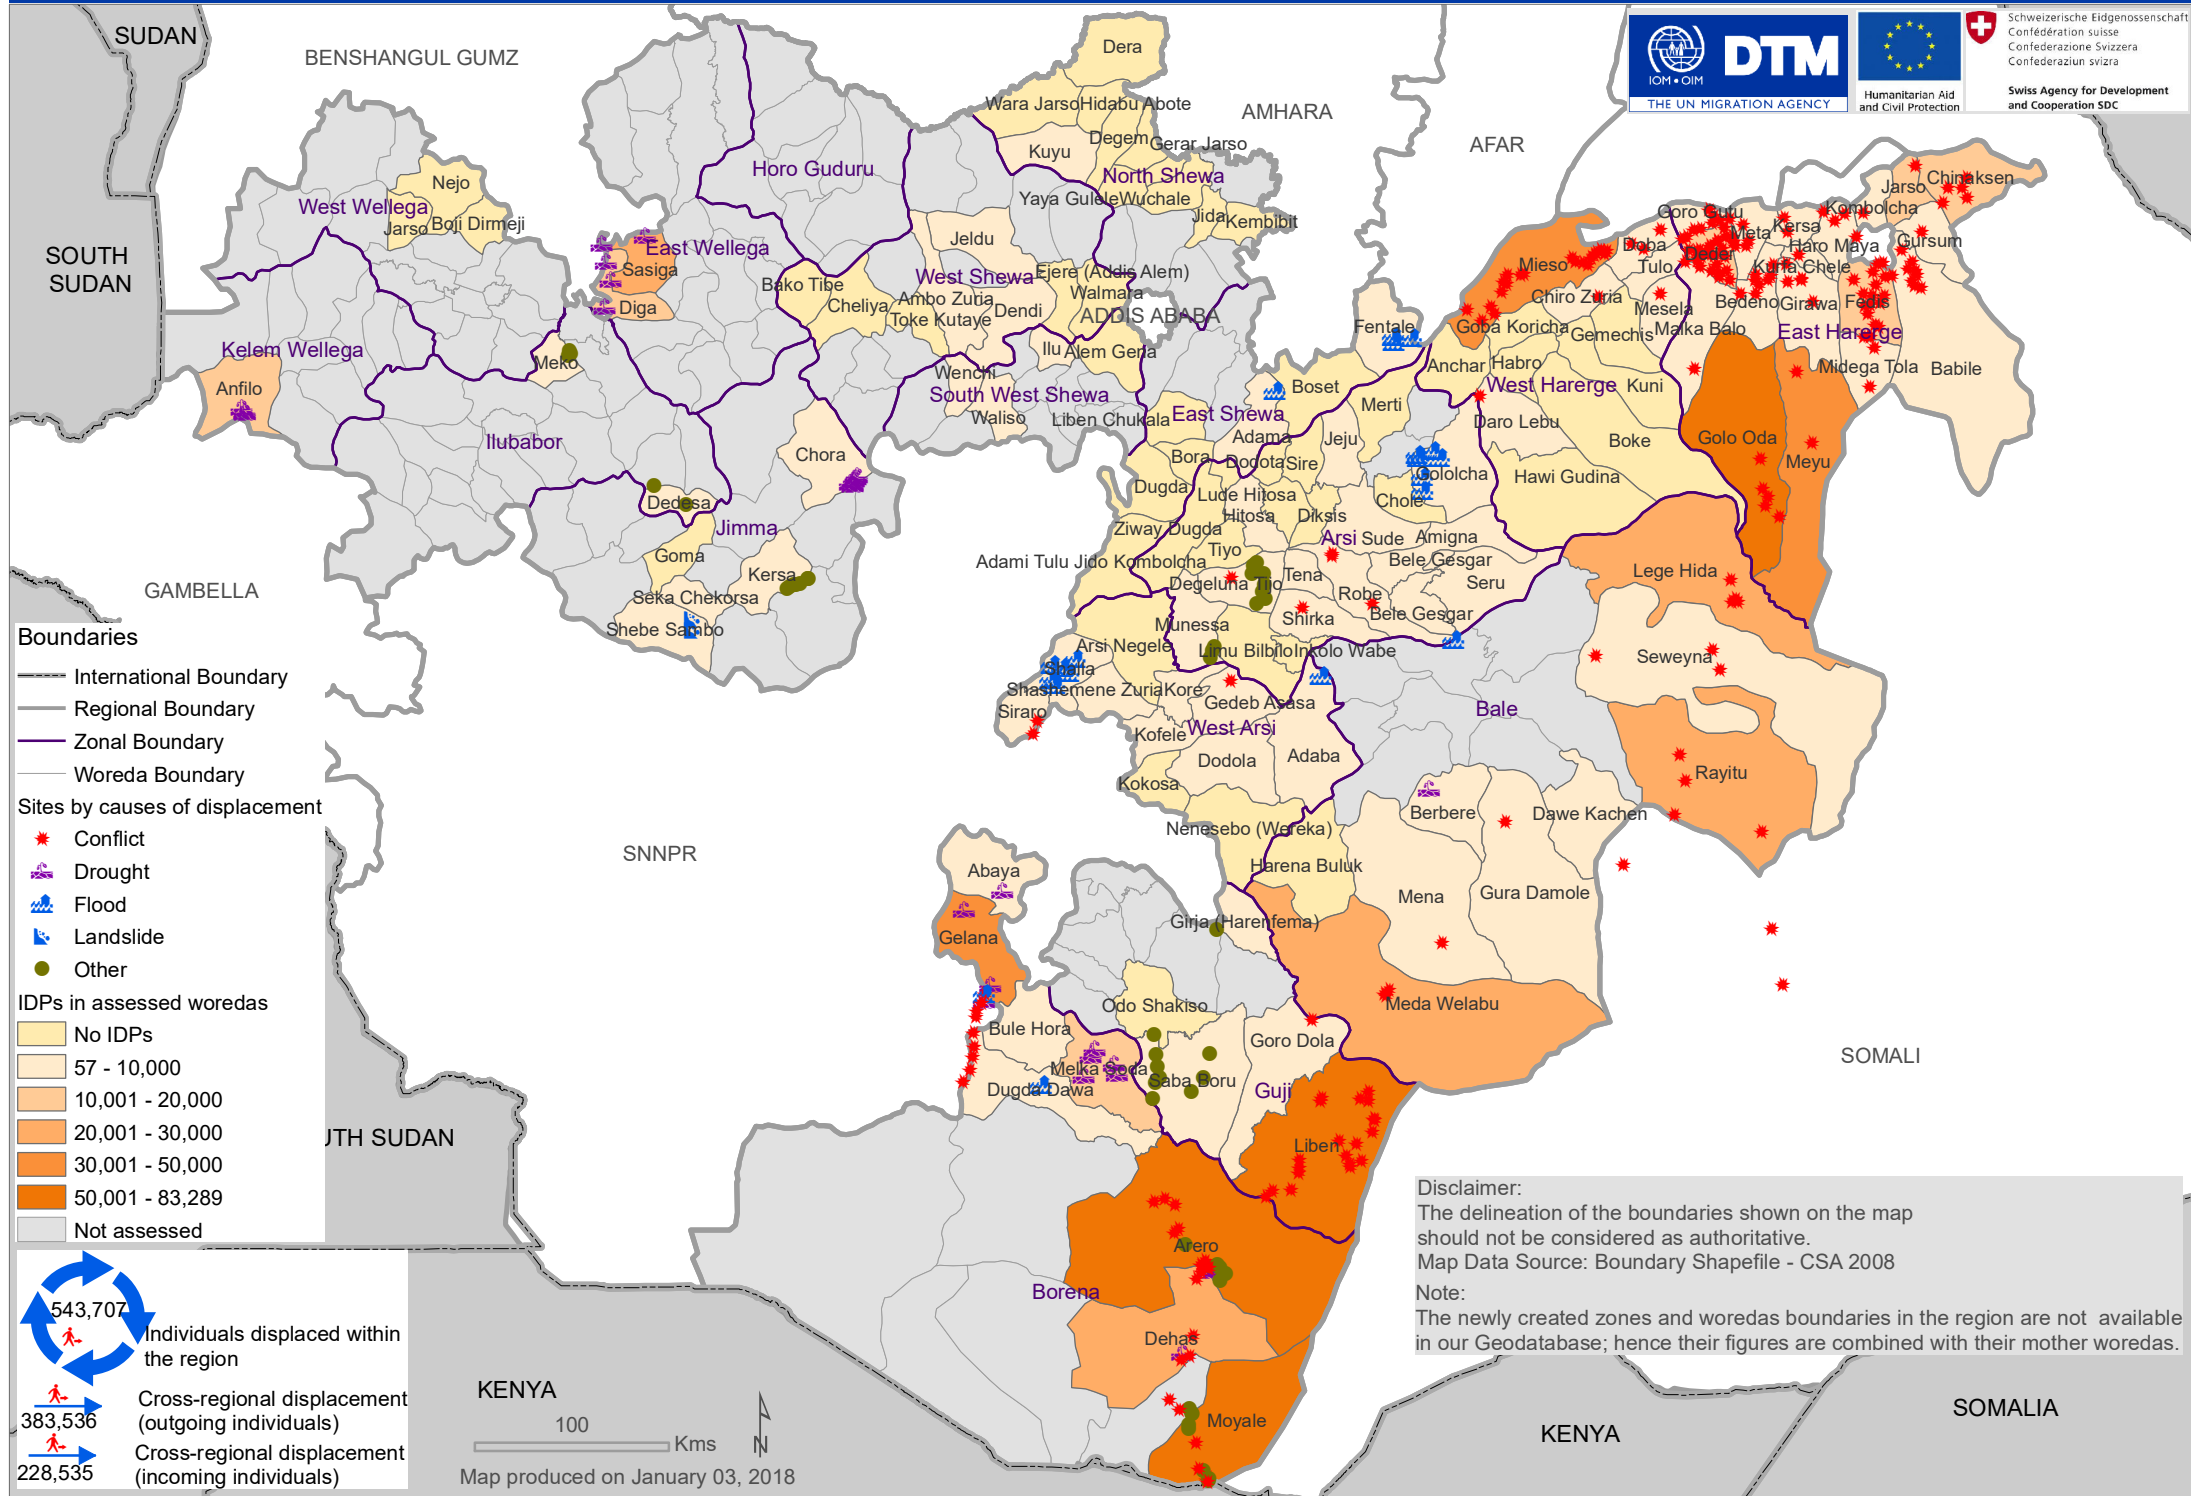

DTM made possible thanks to the European Civil Protection and Humanitarian Aid Operations (ECHO), the Ethiopian Humanitarian Fund (EHF), the Office of United States Foreign Disaster Assistance (OFDA) and the Swiss agency for Development and Cooperation (SDC).

*The opinions expressed in this report are those of the authors and do not necessarily reflect the views of the Office of United States Foreign Disaster Assistance.*
