Flow Monitoring Registry

2,096 displaced individuals³

3.3% of respondents

38 Flow Monitoring Points 1,647 average no. of respondents / FMP

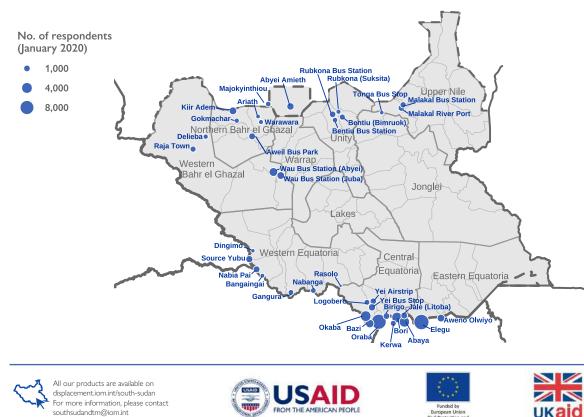

January 2020

DTM's Flow Monitoring Registry (FMR) surveys people on the move at key transit points within South Sudan (SSD) and at its borders. It provides an insight into mobility trends, migration drivers and traveller profiles to inform programming by humanitarian and development partners and by the government. In total, 38 Flow Monitoring Points (FMPs) were active in January 2020, surveying internal flows and cross-border travel with Uganda (UGA), the Democratic Republic of Congo (DRC), Sudan (SDN) and the Central African Republic

62,582 individual journeys surveyed¹ 2.9 average group² size

(CAR). Three FMPs were deactivated in December: Panjala and Busia FMPs in Uganda on the border with Magwi and Morobo Counties, and Paloich FMP in Melut County. Additionally, Lasu and Tokori FMPs (Yei County) were phased out after operations had been suspended for security reasons since October 2019. Figures are only indicative of existing trends among respondents at the active FMPs since DTM does not have full coverage of cross-border or internal flows. Participation in the survey is voluntary and anonymous.

Reasons for displacement³ by direction of travel

Reason for disp.	Outgoing (n = 1,686)	Internal (n = 249)	Incoming (n = 151)
Conflict	42.3%	41.8%	72.2%
Natural Disaster	5.6%	35.7%	2.0%
Food Insecurity	52.1%	22.5%	25.8%

Long / medium term⁴ flows of South Sudanese⁵ to South Sudan (exc. IDPs)

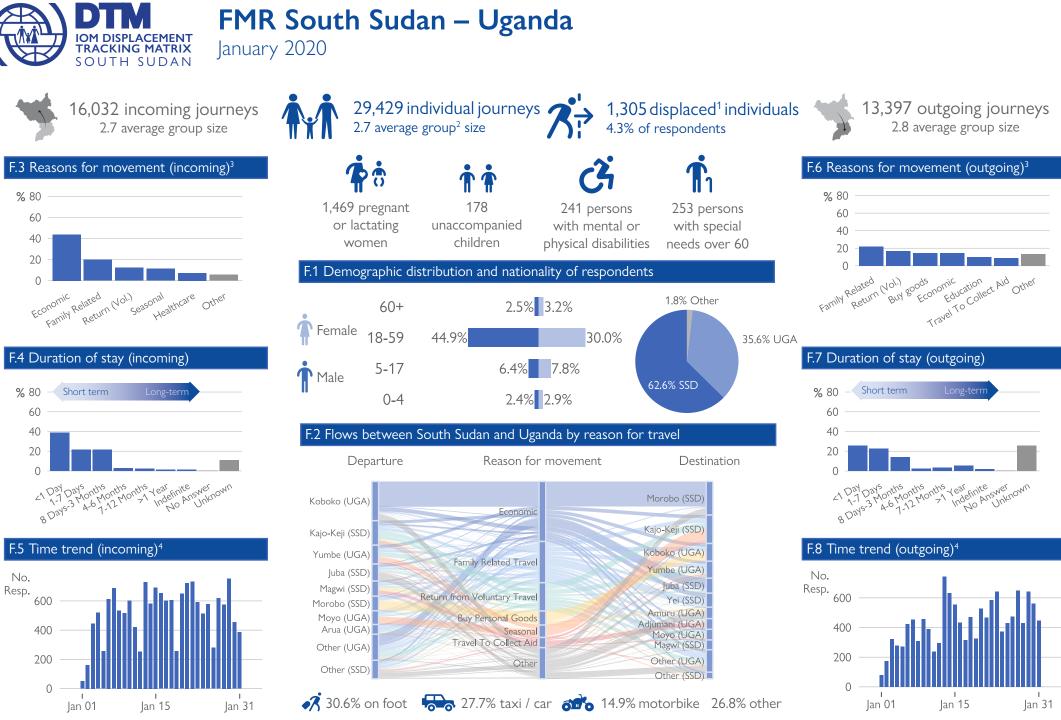

Place of	Voluntary	Forced ³	Voluntary relocation
departure	return	return	
From SSD	1,163	8	254
	(169 refugees)	(0 refugees)	(1 refugees)
From abroad	2,280	43	215
	(409 refugees ⁵)	(28 refugees)	(49 refugees)

Additionally, DTM tracked 1,771 possible voluntary returnees (of which 1,342 from abroad), 46 possible forced returnees (of which 32 from abroad), and 828 possible relocated individuals (of which 246 from abroad) with unreported / unknown intended duration of stay or time spent at the location of departure.

Long / medium term⁴ total migration flows by country

-	•		
Country	Inflow	Outflow	Net flow
Uganda	498 (170 refugees)	411 (68 refugees)	+87 (102 refugees)
DRC	206 (48 refugees)	113 (5 refugees)	+ 93 (43 refugees)
Sudan	2,139 (207 refugees)	552 (38 refugees)	+ 1,587 (169 refugees)
CAR	106 (57 refugees)	134 (O refugees)	-28 (57 refugees)

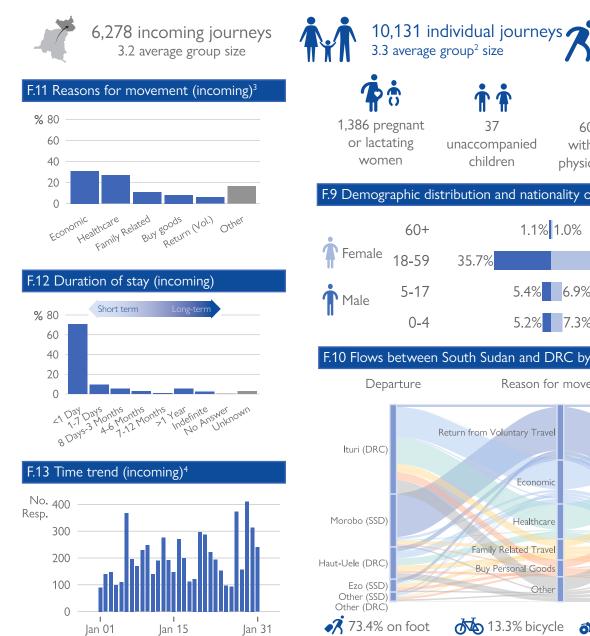

The boundaries on the map do not imply offcial endorsement or acceptance by the Government of the Republic of South Sudan or by IOM. The map is for planning purposes only. IOM cannot guarantee that the map is error free and therefore accepts no liability for consequential or indirect damages arising from its use. [1] Respondents going to or coming from Kenya (1,268 individuals), Ethiopia (7) or non-neighbouring countries (65), as well as respondents whose locations of departure and destination are both outside South Sudan (317), are not included in country-specific analysis. [2] Individuals travelling together are surveyed as a group, which often corresponds to the household. [3] Individuals reporting forced movement due to conflict, natural disaster or food insecurity (if intention to stay over a week) are counted as displaced. [4] Flows are considered to be long / medium term if the group spent over 3 months at the location of departure and intends to spend over 6 months at destination. [5] Registered refugee status is self-reported.

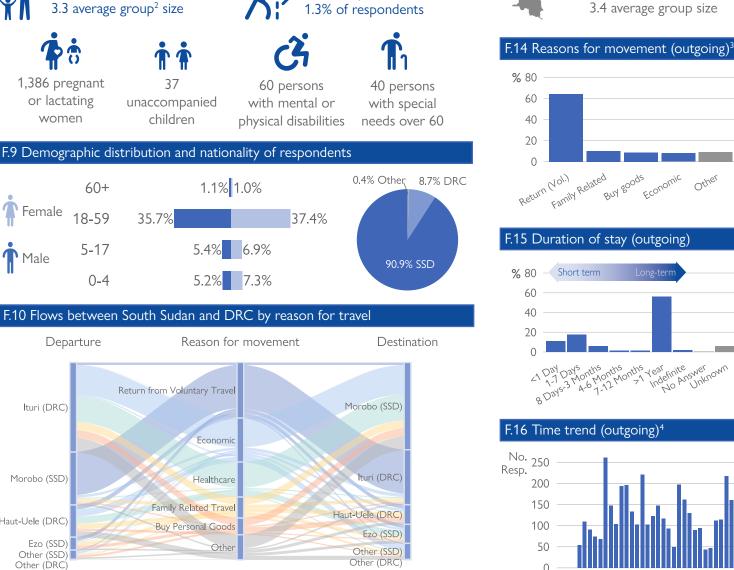

error. 1. [Displacement] Individuals reporting forced movement due to conflict, often corresponds to the household. 3. [F.3, F.6] 'Return (Vol.)' = returning from natural disaster or food insecurity (if intention to stay over a week) are counted as voluntary travel. 4. [F.5, F. 8] The number of individuals surveyed on a given day

Notes: [Rounding] Percentages may not add up to 100% as a result of rounding displaced. 2. [Group] Individuals travelling together are surveyed as a group, which may fluctuate as a result of staffing and access constraints, and does not necessarily reflect the number of individuals travelling.

Methodology

DTM's Flow Monitoring Registry (FMR) surveys people's movement through key transit points within South Sudan and at its borders. The purpose is to **provide regularly updated information on mobility dynamics and traveller demographics, intentions and motivations**. Data is collected on both **internal and cross-border** flows.

Flow Monitoring Points (FMPs) are positioned at strategic border crossings and transport hubs, as determined by a preliminary assessment of high-transit locations. As a result, **the data is indicative of selected key flows** and does not provide a full or statistically representative picture of internal and cross-border movement in South Sudan.

The FMR methodology aims to track all nonlocal traffic passing through an FMP between 8:00-17:00, during the week and on weekends. Trained enumerators briefly survey each group of travellers and collect disaggregated information about individual demographics and vulnerabilities. Participation in the survey is voluntary and children under 15 are not directly interviewed.

FMPs are not active overnight as a result of security constraints and operations may be temporarily suspended in periods of increased risk. Due to staffing constraints, full coverage may not be possible at times of exceptionally high movement through the FMP.

not necessarily reflect the number of individuals travelling.
