

SUMMARY

2,235 Households

7,434 Individuals

12 sites

1,362 Damaged/Flooded shelters

23 Damaged toilets

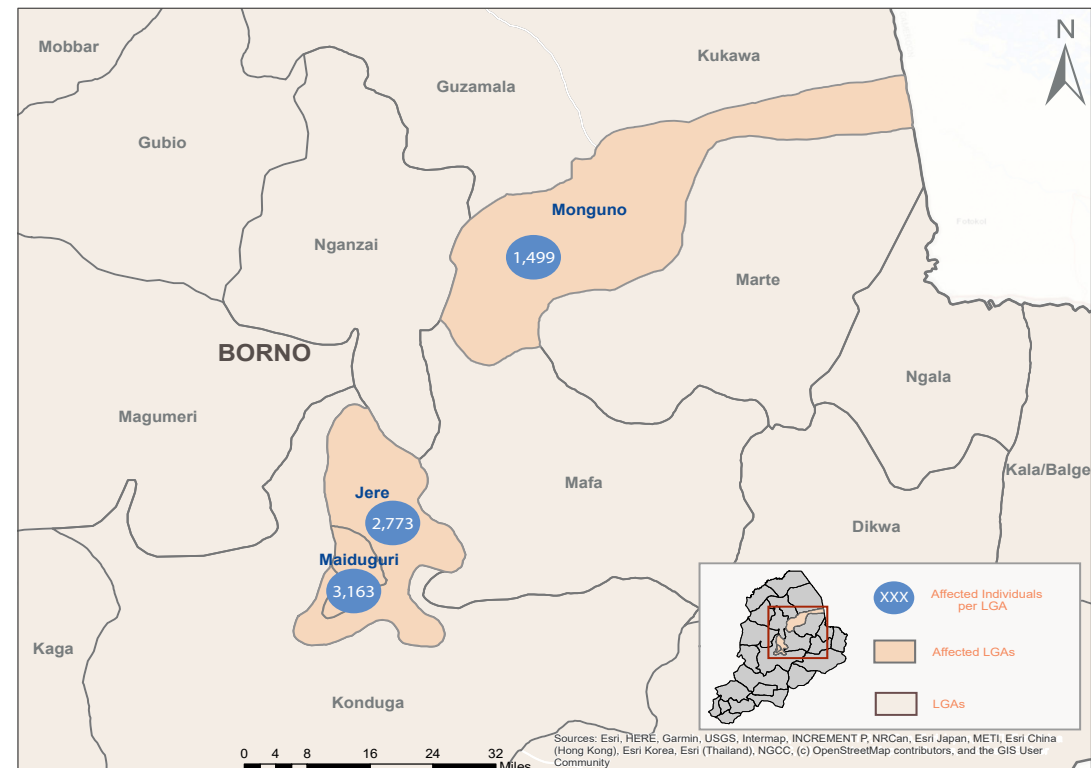

17 Damaged shower points

With the onset of the rainy season in Nigeria's northeastern state of Borno, varying degrees of damages have been reported in camps and camp-like settings. Heavy rainfalls, accompanied by strong winds have caused serious damages to IDP shelters and camp infrastructures.

Between 22 and 28 July 2021, IOM's DTM programme carried out assessments to ascertain the level of damage sustained in camps and camp-like settings due to heavy windstorms and rainfall. Overall, 5 collective settlements, 1 transitional center and 6 camps in Maiduguri M.C, Jere and Monguno LGAs were assessed. The worst-hit of the assessed sites was Tausayi IDP Camp, a collective settlement in Bolori ii ward of Maiduguri M.C LGA, where a heavy rainstorm damaged 481 shelters, affecting an estimated 2,385 individuals.

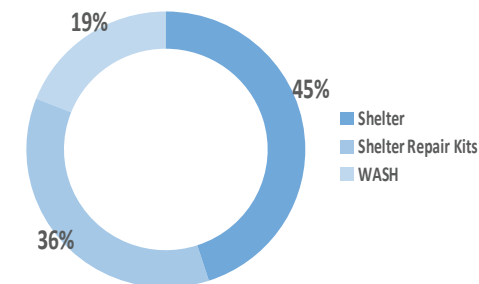

In total, 1,362 shelters were either damaged or flooded by storms, leaving a total of 2,235 households in immediate need of shelter. There were no casualties reported as a result of the storms.

The maps in this report are for illustration purposes only. The depiction and use of boundaries, geographic names, and related data shown on maps and included in this report are not warranted to be error free nor do they imply judgment on the legal status of any territory, or any endorsement or acceptance of such boundaries by IOM.

There is a major need of shelter, shelter repair kits and WASH assistance as most shelters need re-enforcement. As a preventive measure against flooding, most IDP sites need good drainage systems and the use of sand bags to channel the water flow.

Most Needed Assistance. FIG 1.1

Response
No assistance has been given on the date of publication.

Above is a Picture taken at the site showing the flooded areas.

Above are Pictures taken at the site showing damaged shelters.
