

The DTM Emergency Event Tracking (EET) is deployed to track sudden displacement and population movements, provide more frequent updates on the scale of displacement, and quantify the affected population when needed. As a subcomponent of the new Mobility Tracking methodology in Sudan ([Round Two](#)), and activated on a need basis, EET utilises a broad network of key informants to capture best estimates of the affected population presence per location – a useful tool for humanitarian response planning and design.

## Event Overview

**2,420**  
IDP individuals

**484**  
IDP households

DTM teams activated EET to monitor the displacement of individuals following inter-communal clashes between the Mahariya and Biani Hussein Arab tribes on 21 November 2021 over an incident of property theft in As Serief locality, North Darfur. The first EET update estimates that a total number of 2,420 individuals (484 households) are currently seeking shelter in Ghusa Village (67%) and As Serief Town (33%) in North Darfur. The IDP caseload was originally displaced from the villages of Haran, Malha, and Gartobik in North Darfur.

Field teams indicate that there are seven reported deaths and eight reported injuries. Field teams also indicate that 80 individuals report lost livestock and unharvested crops. All affected individuals are Sudanese nationals. DTM teams identified at least 325 cases of additional vulnerabilities in need of assistance and support. Based on a ranking scale, the three priority needs across the caseload are Non-Food Items, Food, and WASH (Water, Sanitation, and Hygiene).

## Shelter Indicator

**89%**  
**430**  
households  
informal settlements  
or open areas

18 to 59 Years

(20%) (22%)

6 to 17 Years

(17%) (19%)

0 to 5 Years

(6%) (7%)

## Return Intention

Data collected through the return intention indicator suggests that all IDPs (100%) intend to return to their location of origin upon improvement of the security situation.

### IOM DISCLAIMER

The opinions expressed in the report are those of the authors and do not necessarily reflect the views of the International Organization for Migration (IOM). The designations employed and the presentation of material throughout the report do not imply the expression of any opinion whatsoever on the part of IOM concerning the legal status of any country, territory, city or area, or of its authorities, or concerning its frontiers or boundaries.

IOM is committed to the principle that humane and orderly migration benefits migrants and society. As an intergovernmental organization, IOM acts with its partners in the international community to: assist in the meeting of operational challenges of migration; advance understanding of migration issues; encourage social and economic development through migration; and uphold the human dignity and well-being of migrants.
