

Displacement Tracking Matrix | DTM Sudan Kalogi, South Kordofan UPDATE 6: 5 JANUARY 2022

EMERGENCY EVENT TRACKING Data collection: 28 December 2021

The DTM Emergency Event Tracking (EET) is deployed to track sudden displacement and population movements, provide more frequent updates on the scale of displacement, and quantify the affected population when needed. As a subcomponent of the new Mobility Tracking methodology in Sudan (Round Two), and activated on a need basis, EET utilises a broad network of key informants to capture best estimates of the affected population presence per location - a useful tool for humanitarian response planning and design.

Event Overview

DTM teams activated EET to monitor the displacement of individuals affected by inter-communal violence across villages in Kalogi, South Kordofan over the issue of land ownership. Clashes erupted on 5 June 2021 involving the Kenana, Kawahla, and Hawazma (Dar Ali) tribes. On 2 December 2021, the conflict between Kawahla and Hawazma tribes renewed over a livestock dispute. For more information, please see EET Kalogi, South Kordofan Update 005

The sixth EET update estimates a total number of 14,620 individuals (3000 households) currently seeking shelter in villages across Abu Jubayhah locality (73%), Rashad (14%), Abu Kershola (6%), Al Leri (6%), and Abassiya (0.25%) localities in South Kordofan. The increase in the IDP caseload since the previous update can be attributed in large part to a reverification exercise conducted by the field team as well as an additional six sites visited.

Field teams indicate that 57 individuals were killed, 48 individuals were injured, and 864 individuals report lost goods/cattle/livestock. All displaced individuals are Sudanese nationals. DTM teams identified at least 1928 cases of additional vulnerabilities in need of assistance and support. Consistent with the previous EET, and based on a ranking scale, the three priority needs across the caseload are Food, Emergency Shelter, and Non-Food Items.

Return Intention

Data collected through the return intention indicator suggests that 8,753 IDPs intend to remain the same place (60%), 4,966 (34%) IDPs intend to return to locations of origin when the security situation improves, 394 IDPs (3%) intend to move to another location and the intention of 507 (3%) IDPs is currently unknown.

The opinions expressed in the report are those of the authors and do not necessarily reflect the views of the International Organization for Migration (IOM). The designations employed and the presentation of material throughout the report do not imply the expression of any opinion whatsoever on the part of IOM concerning the legal status of any country, territory, city or area, or of its authorities, or concerning its frontiers or boundaries

OM is committed to the principle that humane and orderly migration benefits migrants and society. As an intergovernmental organization, IOM acts with its partners in the international community to: assist in the meeting of operational challenges of migration; advance understanding of migration issues; encourage social and economic development through migration; and uphold the human dignity and ng of migrants
