

EMERGENCY EVENT TRACKING

Data collection: 10 March 2022

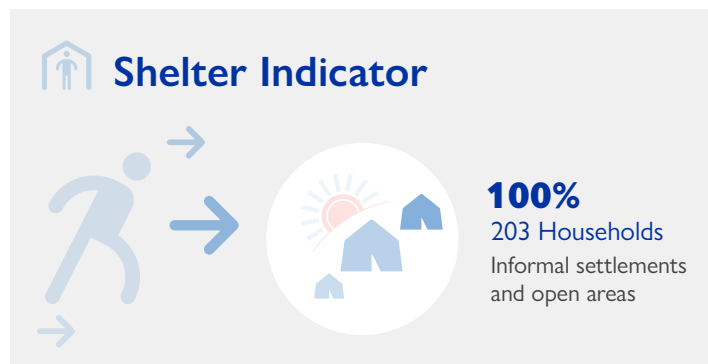

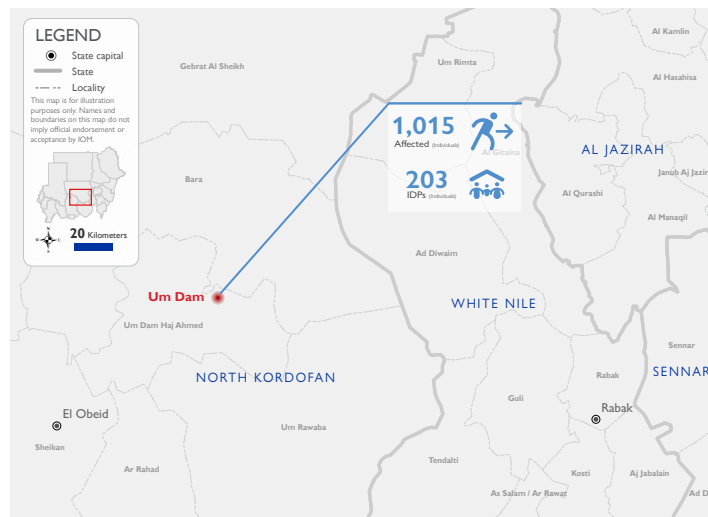

The DTM Emergency Event Tracking (EET) is deployed to track sudden displacement and population movements, provide more frequent updates on the scale of displacement and quantify the affected population when needed. As a subcomponent of the new Mobility Tracking methodology in Sudan ([Round Three](#)), and activated on a need basis, EET utilises a broad network of key informants to capture best estimates of the affected population presence per location – a useful tool for humanitarian response planning and design.

Event Overview

DTM teams activated EET to monitor the displacement of individuals on 6 March 2022, after rising temperatures in Wad Al Maki village, located approximately 55km southeast of Um Dam Town in Um Dam Haj Ahmed locality, North Kordofan, led to the outbreak of a fire. The first EET update estimates a total of 1,015 IDPs (203 households) were displaced and are currently seeking shelter around Wad Al Maki village. The houses of all affected households were completely destroyed. The entire IDP caseload (100%) is currently seeking shelter in informal settlements and gathering sites.

All affected individuals are Sudanese nationals. Field teams recorded 234 additional vulnerabilities in need of assistance and support ¹ Field teams indicate that there are no deaths or injuries, while all affected households have reportedly lost their belongings and agricultural crops following the incident. Based on a ranking scale, the three main priority needs identified are emergency shelter, food, and WASH (Water, Sanitation, and Hygiene). The area remains accessible to all humanitarian actors.

IOM DISCLAIMER

The opinions expressed in the report are those of the authors and do not necessarily reflect the views of the International Organization for Migration (IOM). The designations employed and the presentation of material throughout the report do not imply the expression of any opinion whatsoever on the part of IOM concerning the legal status of any country, territory, city or area, or of its authorities, or concerning its frontiers or boundaries.

IOM is committed to the principle that humane and orderly migration benefits migrants and society. As an intergovernmental organization, IOM acts with its partners in the international community to: assist in the meeting of operational challenges of migration; advance understanding of migration issues; encourage social and economic development through migration; and uphold the human dignity and well-being of migrants.

Return Intention

Data collected through the return intention indicator suggests that the entire IDP caseload (100%) intends to return to their sites of origin as soon as they can reconstruct their homes.

¹ Using the WHO global estimate that approximately 15% of the total population are persons with disabilities (PwDs), DTM estimates a total of 152 PwDs among the IDP caseload registered. The remaining 82 vulnerabilities have been identified among the IDP caseload by key informants.
