**Demographics**

- **Male**: 45%
- **Female**: 55%

**DISPLACEMENT LOCATIONS**

- **Host communities**: 95%
- **Sites**: 5%

**METHODOLOGY:** IOM’s Displacement Tracking Matrix is a comprehensive system to analyse and disseminate information to better understand the movements and needs of Internally Displaced Persons (IDPs) in Burundi. The baseline assessment aims at providing information on the stock (presence) by commune of IDPs which are categorized into two groups: Internally Displaced Persons (IDPs) including IDPs who returned to their commune of origin but not their home and returnees who became IDPs. The baseline assessment also collects information on the cause of displacement and the type of shelter hosting IDPs. Data collection is conducted four times per year by trained Burundian Red Cross volunteers operating at all administrative levels: provinces, communes and communes.

1 Internally Displaced Persons (IDPs): are Burundian nationals who have been forced to flee or forced to leave their home ... situations of violence widespread, human rights violations or natural or man-made disasters or to avoid their effects, and which have not crossed the internationally recognized borders of a State. For the purpose of DTM, only IDPs displaced since 2013 or later are considered IDPs.

2 Returnees who became IDPs: Burundian nationals who had been displaced outside the country and have since returned (spontaneously or assisted) to Burundi but continue being in displacement (because their houses were destroyed or for other reasons).
