

EMERGENCY EVENT TRACKING

Data collection: 30 APRIL 2022

CONFLICT

The DTM Emergency Event Tracking (EET) is deployed to track sudden displacement and population movements, provide more frequent updates on the scale of displacement, and quantify the affected population when needed. As a subcomponent of the new Mobility Tracking methodology in Sudan (Round Three), and activated on a need basis, EET utilises a broad network of key informants to capture best estimates of the affected population presence per location – a useful tool for humanitarian response planning and design.

Event Overview

DTM teams activated EET to monitor the displacement of individuals affected by inter-communal violence in Kereneik locality, West Darfur. Clashes erupted on 4 December over a property dispute at a local market involving Arab nomads and Masalit tribe. For more information, please see Update 006. On 22 April 2022, inter-communal clashes resumed between Arab Nomads and the Masalit tribe following the discovery of two deceased nomads on 21 April 2022 near Hashaba village in Kereneik locality, West Darfur. Heavy clashes continued until 25 April after which no further incidents were reported. Field teams report that 16 villages across Kereneik locality were affected in the renewed attack, including five that were completely burnt/looted.

The seventh EET update estimates a total number of 86,775 individuals (17,355 households) currently seeking shelter in Kereneik town (91%), Um Tajok (5%), and Moryat village (2%) in Kereneik locality, and Ag Geneina locality (2%), West Darfur. The majority of the IDP caseload in Kereneik Town is currently residing between the town's main military compound and the Boy's and Girl's Elementary School campus grounds. The IDP caseload was originally displaced from Hai Alsehrej (21%), Hai Al Jabal (17%), Abuja IDP camp (17%), Hai Al Matar (6%), Hai Al Nasser (6%), Um Down (5%), Hai Al Madaris (3%), Salami village (2%), Hai Al Zehour (2%), Hai Abu (1%), Hai Alwadi (1%), among other villages in Kereneik locality.

DTM field teams have confirmed, upon reverification, that at least 217 individuals were killed with a further 134 individuals sustaining injuries, and a total of seven individuals report lost goods, livestock, and/or cattle. All displaced individuals are Sudanese nationals. At least 13,033 cases of additional vulnerabilities in need of assistance and support were identified by key informants through DTM's Protection indicator. Additionally, DTM Sudan estimates that there are approximately 13,016 persons with disabilities among the IDP caseload.¹ Based on a ranking scale, the three priority needs across the caseload are WASH (Water, Sanitation, and Hygiene), Food, and Emergency Shelter.

IOM DISCLAIMER
The opinions expressed in the report are those of the authors and do not necessarily reflect the views of the International Organization for Migration (IOM). The designations employed and the presentation of material throughout the report do not imply the expression of any opinion whatsoever on the part of IOM concerning the legal status of any country, territory, city or area, or of its authorities, or concerning its frontiers or boundaries.
IOM is committed to the principle that humane and orderly migration benefits migrants and society. As an intergovernmental organization, IOM acts with its partners in the international community to: assist in the meeting of operational challenges of migration; advance understanding of migration issues; encourage social and economic development through migration; and uphold the human dignity and well-being of migrants.

¹ DTM Sudan adopts the WHO global estimate that approximately 15% of the total population are persons with disabilities (PwD).
