

EMERGENCY EVENT TRACKING

Data collection: 23 June 2022

The DTM Emergency Event Tracking (EET) is deployed to track sudden displacement and population movements, provide more frequent updates on the scale of displacement, and quantify the affected population when needed. As a subcomponent of the new Mobility Tracking methodology in Sudan ([Round Three](#)), and activated on a need basis, EET utilises a broad network of key informants to capture best estimates of the affected population presence per location – a useful tool for humanitarian response planning and design.

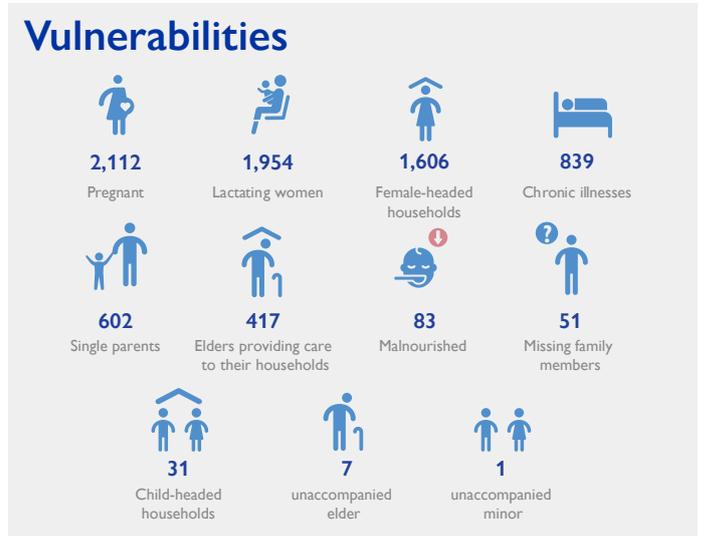

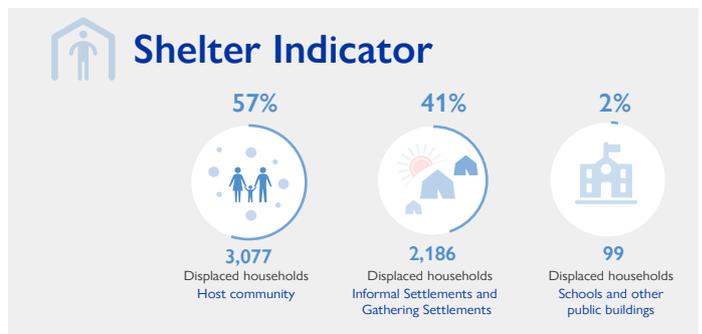

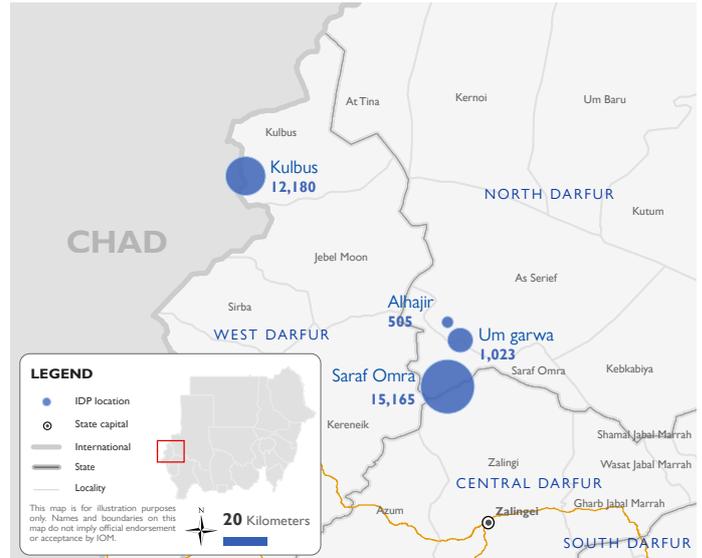

## Event Overview

DTM Teams activated EET to monitor inter-communal clashes between the Gamar and the Arab Abala tribes erupting on 6 June 2022 in Haraza village in Kulbus locality, West Darfur following a dispute over land ownership (see [EET Kulbus \(Haraza\), West Darfur \(Update 001\)](#)). During data collection for Update 001, many locations of displacement were inaccessible to field teams due to the poor security situation. The humanitarian situation improved in the following weeks, and between 21 and 23 June 2022, DTM field teams participated in an inter-agency assessment of IDPs within West Darfur. The increase in the IDP caseload between first and second updates is a reflection of the increased number of gathering sites visited by field teams during data collection.

The second EET update estimates a total number of 28,873 IDP individuals (5,362 households) currently seeking shelter in Saraf Omra Town (53%), Saraf Omra locality, and Um Garwa (4%) and Alhajir (2%) villages in As Serief locality North Darfur, as well as Adawi (26%), Weri Weri (6%), Abu Jouga (4%), Shegog (3%), and Helat Abunorain (1%), among other locations (1%). The IDP caseload was originally displaced from Kulbus (48%), Jebel Moon (3%), and other Kereneik (2%) localities, West Darfur, and Saraf Omra (41%) and As Serief (4%) localities, North Darfur and Azum (2%) locality in Central Darfur.

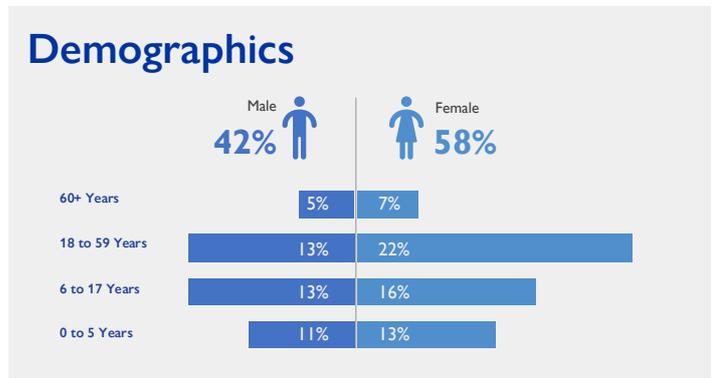

DTM field teams have confirmed that at least 146 individuals were killed with a further 167 individuals sustaining injuries, and a total of 374 individuals report lost goods, livestock, and/or cattle. All displaced individuals are Sudanese nationals. At least 7,703 cases of additional vulnerabilities in need of assistance and support were identified by key informants through DTM's Protection indicator. Additionally, DTM Sudan estimates that there are approximately 4,331 persons with disabilities among the IDP caseload.\*Based on a ranking scale, the three priority needs across the caseload are Non-Food Items, Food, and WASH (Water, Sanitation and Hygiene).

**IOM DISCLAIMER**

The opinions expressed in the report are those of the authors and do not necessarily reflect the views of the International Organization for Migration (IOM). The designations employed and the presentation of material throughout the report do not imply the expression of any opinion whatsoever on the part of IOM concerning the legal status of any country, territory, city or area, or of its authorities, or concerning its frontiers or boundaries.

IOM is committed to the principle that humane and orderly migration benefits migrants and society. As an intergovernmental organization, IOM acts with its partners in the international community to: assist in the meeting of operational challenges of migration; advance understanding of migration issues; encourage social and economic development through migration; and uphold the human dignity and well-being of migrants.

### Return Intention

Data collected through the return intention indicator estimates that the entire displaced caseload (100%) intend to return to their locations of origin upon improvement of the security situation.

\*DTM Sudan adopts the WHO global estimate that approximately 15% of the total population are persons with disabilities (PwD).
