

## New Arrival Malnutrition Screening Summary (children 6-59 months)

An exhaustive nutrition screening using mid upper arm circumference (MUAC) and signs of Oedema was conducted by Sector partners for 158 children. Of the 158 children screened, the MUAC reading for 52 children (51 from inaccessible and 1 from an accessible area) was in the Red category, 41 were in the Yellow category and 65 were measured in the Green category. No case of Oedema was reported in any of the 4 LGAs where screening was conducted.
