

The objective of the Emergency Tracking Tool (ETT) - Movement Alert is to collect information on large and sudden population movements, and to provide support to the Government and the humanitarian community by disseminating data on IDPs for informing effective humanitarian response to the affected population. Information is collected through key informant interviews or direct observation. The dashboard provides basic information on displacements recorded in Mueda district between 13th to 15th November. This ETT Movement Alert forms part of a larger exercise in mapping displacement trends on a weekly basis. Reported findings complement information obtained through other DTM data collection activities in the country. Additional information is available upon request.

MOVEMENT ALERT

SUMMARY OF THE EVENT

From 13-15 November, DTM teams in Vila de Mueda observed the arrival of 2,366 IDPs coming from Ngapa sede, Namatil, Naschitenje, Naida, Mocimba de Rovuma, and Nahamba localities. Arrivals have been mapped across host communities in Vila de Mueda as well as Eduardo Mondlane Relocation Centre. Of these recorded movements, children constitute the majority of the travellers (48%). An estimated 49 elderly, 18 people with disabilities and 21 pregnant women were additionally reported within these observed movements.
