

## KEY MESSAGES

- This week there were only 330 new arrivals through the Baidoa checkpoints, the fewest number recorded by MTT since Mid- January. After sixth week in a row with no exit, 13 individuals were recorded exiting the town to cultivate their farms, since the Gu seasonal rains had begun in their villages of origin. The key drive factors for displacements in to Baidoa were prolonged drought and insecurity at their village of origin.
- As for why IDPs were entering Baidoa this week, all the new entries cited either water (62%), insecurity (22%), Luck of food (8%) or access to Health (8%) as the key driving factors for displacement into the IDP sites in Baidoa.
- As reported in this week, (44%) of those entering came from the district of Baardhere, (26%) from Baidoa district, (15%) from Wajid district and (15%) from Hudur district. They were heading to the IDP sites of Eesaw (44%), Sarmandhere (31%), Gumurow (16%) and Manay (9%).
- All of the exits this week said that they were leaving to manage their farms, since the Gu seasonal rains had begun their villages of origin. All of those exiting were from the IDP site of Boodaaw (100%) and all were returning to Baidoa District in Bay (100%). All families said that they intend to return to the IDP sites in Baidoa.

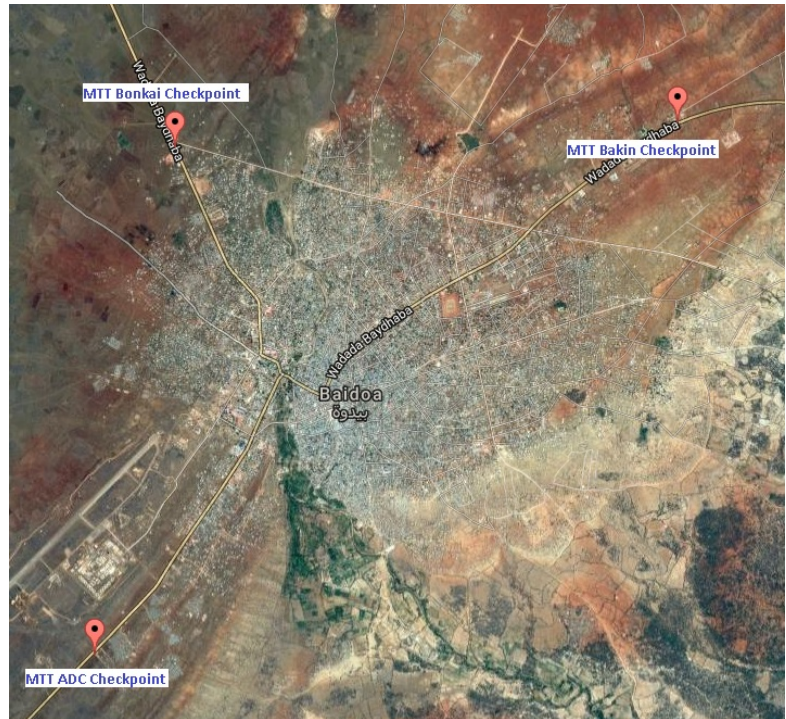

## METHODOLOGY

Movement Trend Tracking (MTT) is a movement monitoring exercise that tracks people who are moving in or out of sites on a semi-permanent or permanent basis. MTT aims to gauge the pulse of movements in and out of sites in Baidoa.

MTT figures should not be considered official updates to the population figures of the sites. Rather, the data represents the intentions of IDPs and points towards general trends in their movements.

In Baidoa, IOM enumerators are positioned at the 3 main checkpoints in and out of town (shown on the map on the right) from 6:30am until 5:30pm, 7 days a week.

From these checkpoints, the teams identify people who are moving in or out of Baidoa with luggage. Interviews are done with the individual or the head of household.

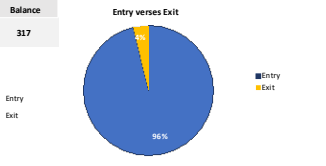

MTT aims to complement existing information management products on displacements and movements in Baidoa, by providing site level specific data on population movements on a regular basis, to assist agencies operating in sites and settlements with key information on: demographics of movement, area of origin, area of return/onward movement, reasons for movement and movement trends over time.

IOM MTT enumerators identify new arrivals and conduct interviews with the heads of household. Photo credit IOM.
