

EMERGENCY EVENT TRACKING

Data collection: 20 – 24 March 2021

CONFLICT

The DTM Emergency Event Tracking (EET) is deployed to track sudden displacement and population movements, provide more frequent updates on the scale of displacement, and quantify the affected population when needed. As a subcomponent of the new Mobility Tracking methodology in Sudan ([Round One](#)), and activated on a need basis, EET utilises a broad network of key informants to capture best estimates of the affected population presence per location – a useful tool for humanitarian response planning and design.

Event Overview

Graph 1: Number of IDPs by Emergency Event Tracking Date
 * Data illustrated on Graph 1 depicts the increasing caseload of IDPs as they were found, not as they were displaced.

Places of Origin⁵

Displaced Caseload Located Outside of Ag Geneina Town

Displacement sites	# IDP Individuals	# IDP Households
Kereneik	6,640	1,328
Shukry	2,250	450
Muli	470	95
Sisi camp	175	35
Grand Total	9,535	1,908

DTM teams activated EET to monitor the displacement of individuals affected by inter-communal conflict between Masalit and Arab tribes. Clashes erupted on 16 January 2021 in the Krinding area of Ag Geneina town, West Darfur. For more information, please see [EET Ag Geneina, West Darfur 010](#).

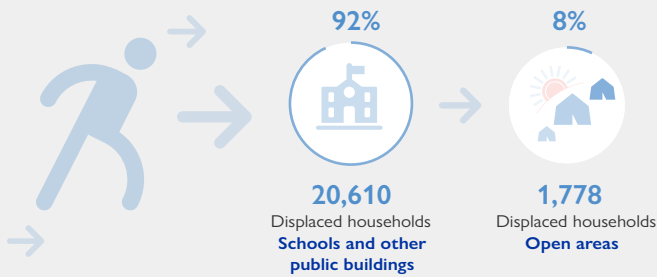

The eleventh update estimates a total number of 109,264 individuals (22,388 households) seeking shelter in Ag Geneina and its surrounding villages, having been displaced from Krinding 1 and 2 IDP camps (51%), Sultan House area (15%), Hai Eljabal area (4%) and other sites nearby (30%). All displaced individuals are Sudanese nationals. Since the tenth update, there has been a one per cent increase in the captured number of individuals displaced, including an increase of 960 individuals (192 households) in the newly identified site of Alfari, Ag Geneina town, having arrived from 35 villages across Eish Barra admin unit, Ag Geneina locality.¹ On the other hand, there has been a decrease of 250 individuals (54 households) across seven identified sites in Ag Geneina town, due to overcrowding.² It remains unknown where these 250 individuals are sheltering at present.

DTM teams have visited Alfari site since the previous update, to verify the data and provide best estimates on the entire caseload across all displacement sites. Subsequently, at least 14,517 individuals are reported to have additional vulnerabilities in need of assistance and support.³ DTM teams identify 166 individuals have been killed and 427 sustained injuries, whilst at least 7,773 internally displaced persons (IDPs) have lost personal belongings and livestock.⁴ Based on a ranking scale, the three main priority needs for the displaced caseload in Ag Geneina town remain as WASH (water, sanitation, and hygiene), education, and health (medical needs). On the other hand, priority needs in the villages surrounding Ag Geneina town remain as food, non-food items and WASH.

¹ This new site has been added to the EET series following approval from the Humanitarian Aid Commission (HAC) and UN OCHA.
² The seven sites having had a decrease in caseload are (1) Mohira Girls School, (2) Commercial School for Girls, (3) Local Government Office, (4) Workers Union Office, (5) Al Jameela Center, (6) New Theatre, and (7) Central Library.
³ Since the tenth EET update, there has been an increase of 291 reported vulnerabilities pertaining to the caseload of 960 individuals identified in Alfari, Ag Geneina town.
⁴ Since the tenth EET update, there have been no changes to the losses/impact of the conflict on the displaced populations.
⁵ Where possible, the Krinding area has been further disaggregated into the respective villages of Droti, UmDuwin and Darelinaem, as well as Krinding 1 and Krinding 2 IDP camps (reflected in EET 008 to 011 datasets).

Shelter Indicator

Priority Needs (Ranking scale)

AG GENEINA TOWN

SURROUNDING VILLAGES

Through its shelter indicator, DTM identified 20,610 IDP households (92%) sheltering in schools and other public buildings dispersed across Ag Geneina town, as well as Muli village and Sisi camp. The remaining caseload of 1,778 IDP households (8%) are gathering in open areas of Shukry and Kereneik villages.

Of the 109,264 IDPs located in Ag Geneina town and its surrounding villages, 57,021 (52%) are female and 52,243 (48%) are male. Further disaggregation by age indicates 0 to five as the predominant age category (17% female, 15% male), followed by ages 18 to 59 (16% female, 15% male), six to 17 (15% female, 14% male) and 60 and over (4% female, 4% male).

At least 14,517 cases of additional vulnerabilities in need of further support and assistance were identified through DTM's protection indicator. Lactating and malnourished individuals made up 21 and 20 per cent respectively, followed by female-headed households (15%), pregnant women (14%), child-headed households (8%), elders providing care to their households (6%), single parents (6%), unaccompanied elders (4%), physical disabilities (2%), mental illnesses (2%), unaccompanied minors (1%) and chronic illnesses (1%). The new data collected since the seventh update on female and child-headed households is consistent with the higher percentage of female (sex) and child (age) demographics observed throughout the EET series.

Based on a ranking scale, the three main priority needs for the displaced caseload in Ag Geneina town remain as WASH (water, sanitation, and hygiene), education, and health (medical needs). On the other hand, the three main priority needs for the displaced caseload in the villages surrounding Ag Geneina town remain as food, non-food items and WASH.

Data on return intention, demographics, protection indicators and priority needs are subject to further verification through registration activities. Displacement figures collected through this activity are further refined with each data collection round to reduce any discrepancies that may result from the miscorrelation of the EET methodology and that of DTM registration activities linked to direct humanitarian assistance.

Return Intention

Data collected through the return intention indicator suggests that all IDPs in Ag Geneina town and its surrounding villages (100%) intend to return to their locations of origin upon improvement of the security situation.
