

The DTM Emergency Event Tracking (EET) is deployed to track sudden displacement and population movements, provide more frequent updates on the scale of displacement, and quantify the affected population when needed. As a subcomponent of the new Mobility Tracking methodology in Sudan ([Round Two](#)), and activated on a need basis, EET utilises a broad network of key informants to capture best estimates of the affected population presence per location – a useful tool for humanitarian response planning and design.

Event Overview

DTM teams activated EET to monitor the displacement of individuals affected by inter-communal conflict between Masalit and Arab tribes. Clashes initially erupted on 16 January 2021 in the Krinding area of Ag Geneina town, West Darfur. From 3rd April 2021, inter-communal conflict has escalated in the Hai Eljabal area of Ag Geneina town, West Darfur, resulting in additional displacement. For more information, please see [EET Ag Geneina, West Darfur 021](#).

The twenty-second update estimates that a total number of 115,525 individuals (23,128 households) are displaced in Ag Geneina and its surrounding villages. The majority of the IDP caseload are currently seeking shelter in Ag Geneina (91%), with the remainder staying in the surrounding villages of Kereneik (6%), Shukry (2%), and Muli (1%).

DTM teams also recaptured (upon further verification) 297 individuals killed and 554 having sustained injuries, whilst at least 11,306 individuals have lost personal belongings and livestock throughout the conflict. Consistent with the twenty first update, and based on a ranking scale, the three main priority needs for the displaced caseload are WASH (water, sanitation, and hygiene), food, and emergency shelter.

¹ Where possible, the Krinding area has been further disaggregated into the respective villages of Droti, Um Down and Darelneem, as well as Krinding 1 and Krinding 2 IDP camps (reflected in EET 008 to 021 datasets).

Shelter Indicator

Priority Needs (Ranking scale)

1 WASH (Water, Sanitation and Hygiene)

2 FOOD

3 EMERGENCY SHELTER

4 NFI NON-FOOD ITEMS

Through its shelter indicator, DTM identified 21,324 IDP households (92%) sheltering in schools and other public buildings. The remaining caseload of 1,804 IDP households (8%) are gathering in open areas or informal settlements.

Of the 115,525 IDPs located in Ag Geneina town and its surrounding villages, 60,493 (52%) are female and 55,032 (48%) are male. Further disaggregation by age indicates 18 to 59 as the predominant age category (16% female, 15% male), followed by ages 6 to 17 (15% female, 14% male), 0 to 5 (15% female, 14% male), and 60 and over (6% female, 5% male).

At least 14,424 cases of additional vulnerabilities in need of further support and assistance were identified through DTM's protection indicator. Lactating and pregnant individuals made up 25% and 17% respectively, followed by malnourished individuals (16%), female-headed households (13%), child-headed households (7%), elders providing care to their households (6%), single parents (5%), unaccompanied elders (5%), physically disabled (2%), mental illnesses (2%), chronic illnesses (1%), and unaccompanied minors (1%).

Based on a ranking scale, the three main priority needs for the displaced caseload in Ag Geneina are WASH (water, sanitation, and hygiene), food and emergency shelter.

Data on return intention, demographics, protection indicators and priority needs are subject to further verification through registration activities. Displacement figures collected through this activity are further refined with each data collection round to reduce any discrepancies that may result from the miscorrelation of the EET methodology and that of DTM registration activities linked to direct humanitarian assistance.

Return Intention

Data collected through the return intention indicator suggests that all IDPs (100%) intend to return to their locations of origin upon improvement of the security situation.

Vulnerabilities

3,641
Lactating women

2,489
Pregnant

2,345
Malnourished

1,828
Female-headed households

944
Child-headed households

844
Elders providing care to their households

738
Single parents

639
Unaccompanied elders

290
Mental illnesses

289
Physical disabilities

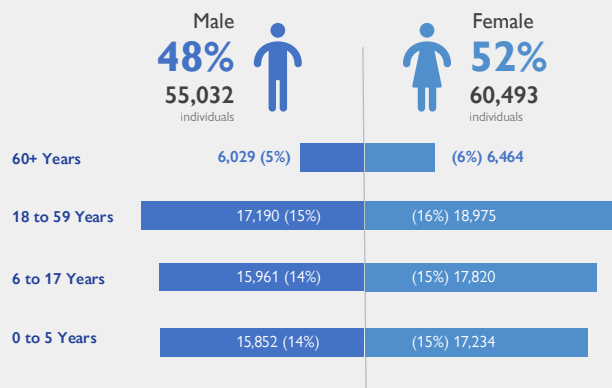

198
Chronic illnesses

179
