

**11,104**  
individuals displaced  
living in EPC de Quitunda

**1,452**  
families  
displaced

**Triggers:**

Attack/  
fear of insecurity

Following the recent attacks in Palma sede, the IOM's DTM team conducted a remote assessment on 15 April 2021 in the displacement location of EPC de Quitunda (**one of the Quitunda displacement locations currently hosting displaced individuals as a result of the attacks**). An estimated 11,104 individuals (1,452 households) are being hosted at this school according to the remote assessment.

All of the displaced people at the EPC de Quitunda attributed their movements on heightened hostilities and fears of insecurity in their home district of Palma. Palma sede was cited by the majority of IDPs as their place of origin prior to displacement.

Displaced households are currently residing in a school (EPC de Quitunda) in the centre of the Quitunda community. The government, according to key informants (KIs), is currently providing some kind of assistance to displaced persons; however, the IDPs are in urgent need of humanitarian assistance.

**Urgent Needs**

**1st** most  
urgent need

**Food**

**2nd** most  
urgent need

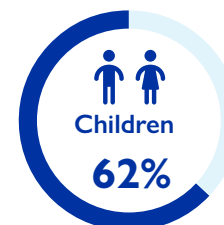

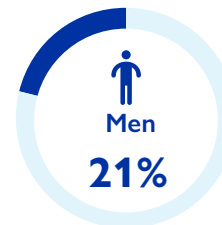

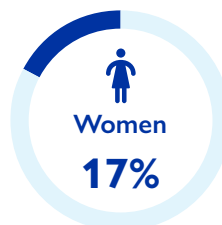

**Shelter**

**3rd** most  
urgent need

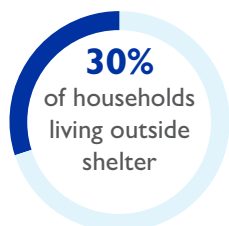

**NFIs**

**Demography**

**Shelter Needs**

Results from the assessment show that 30 per cent of the IDP households (431) are currently sleeping outdoors, whilst the remaining 70 per cent (1,021 households) currently live in makeshift shelter.

The top urgent three NFIs (Non-Food Items) needed are tarps, blankets and cloths.

**Vulnerability**

Lactating mothers		40
Elderly headed households		23
Pregnant females		20
Unaccompanied children		15
Elderly persons without care givers		11
Physical disability		7
Persons with chronic diseases		6
