DISPLACEMENT TRACKING MATRIX (DTM) OROMIA REGION ETHIOPIA

ROUND 17: May/June 2019

REGION - KEY FINDINGS

LOCATION AND CAUSE OF DISPLACEMENT:

877,537 displaced individuals comprising 145,217 households in 460 displacement sites were identified in Oromia region. These figures represent an increase of 24,964 individuals (+2.93%), an increase of 901 households (+0.62%), a decrement of 3 sites (-0.65%) since round 16 (March/April 2019). 13% of sites opened during 2018 and 3% site opened in 2019. Conflict was the primary cause of displacement for an estimated 78.87% of the displaced population.

DEMOGRAPHICS: 51% of displaced individuals were female and 49% were male. 59% were younger than 18 years old while 4% were over 60 years old.

SHELTER: 212 sites reported that over 25% of households were living in shelters that were below regional and cultural standards.

WASH: 11 sites meet SPHERE standards of access to over 15 liters of water per person per day. 181 displacement sites (39%) reported having no latrines.

FOOD, NUTRITION AND LIVELIHOODS: 38 sites (8%), representing 82,524 individuals, reported no access to food. 82% of sites reported that IDPs did not have access to income generating activities.

HEALTH: Diarrhea was the primary health concern in this round of data collection with 132 sites reporting this.

EDUCATION: In 48% of sites, 50% or less of the children on site are attending formal primary school. Formal primary school education is available at 374 sites. Alternative basic education (ABE) is available at 28 sites.

COMMUNICATION: 57% of sites reported that Site Management were IDPs' primary source of information followed by Local Leader at of 22% sites.

Figure 2 shows IDP numbers disaggregated by cause over time.

Figure 1 illustrates trends in stock totals of displacement in the region over time compared to recent displacement.

Figure 1: Trends in stock totals of displacement and new displacements from 2018 to 2019

Figure 2: IDPs by cause of displacement by round

DISPLACEMENT TRACKING MATRIX (DTM) OROMIA REGION ETHIOPIA

ROUND 17: May/June 2019

MOBILITY TRENDS AND CAUSE OF DISPLACEMENT

Conflict has consistently been reported as the primary cause of displacement in the region (as indicated by figure 4). IDPs displaced in 2019, during 2018 and before 2018 reported being displaced by . In addition to this, 197,390 of IDPs (22%) reported being displaced previously. Furthermore, IDPs from 13 sites were leaving the current place of displacement. Of these, IDPs from 24 sites were going to the nearest village and IDPs from 8 sites intended to return to their place of origin.

Regarding the duration of sites: 3% of all sites identified opened in 2019 while 13% opened in 2018. 84% of sites opened before 2018.

The majority of IDPs identified in the region were displaced to locations near their areas of origin. 66% of IDPs in the region are internally displaced from the region, within the region. Of the IDPs displaced within the region, 55% were displaced within their zone of origin.

Figure 3 shows the number of IDPs displaced by zone and cause of displacement. Figure 4 shows the distribution of IDPs by driver of displacement and time of displacement.

Figure 3: IDPs displaced by zone and cause of displacement

Duration	Conflict Induced	Climate Induced	Other	Grand Total
Before 2018	579,535	107,639	50,508	737,682
During 2018	89,781	10,256	15,320	115,357
In 2019	22,773	1,725		24,498
Grand Total	692,089	119,620	65,828	877,537

Figure 4: Distribution of IDPs by cause of displacement and time of displacement

ROUND 17: May/June 2019

DURABLE SOLUTIONS, VULNERABILITIES AND DEMOGRAPHICS

In 56% of the sites IDPs foresaw a resolution to their displacement, while IDPs at 44% of sites did not.

At 45% of sites, IDPs prefer local integration as a durable solution to their displacement while 27% sites they prefer return.

Figure 5 shows the number of sites by obstacles to returns, while figure 6 shows support IDPs need to return or locally integrate.

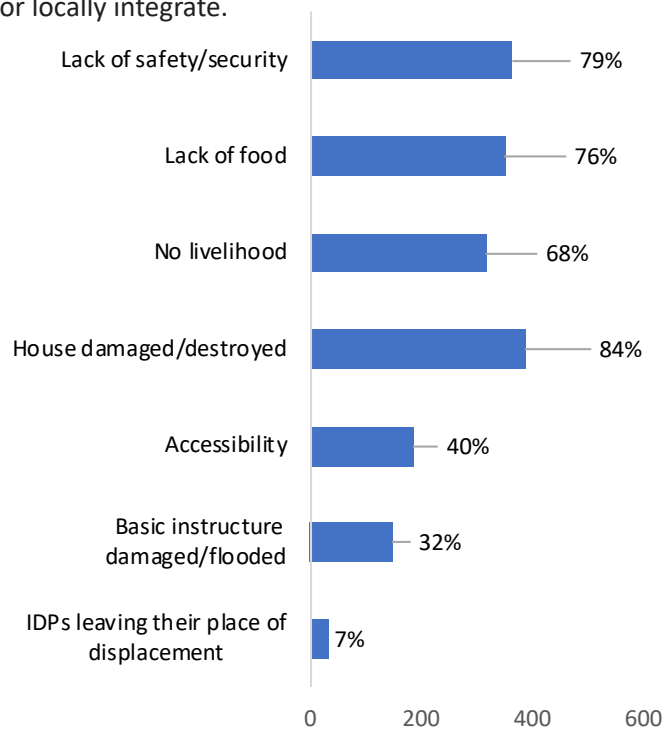

Figure 5: Number of sites by obstacles to return

The demographic breakdown is shown in figure 7. Individuals with specific vulnerabilities were also reported at displacement sites and are represented in figure 8.

Figure 6: Number of sites by support needed to return or locally integrate

Figure 7: Demographic breakdown

Vulnerable Population	Number of IDPS
Number of breastfeeding mothers	29,371
Elderly headed households	6,603
Elderly persons without care givers	4,312
Number of members of ethnic minorities	452
Number of members of religious minorities	788
Orphaned children	1,110
Persons with chronic diseases/serious medical conditions	806
Number of persons with disabilities over 18	1,047
Number of persons with disabilities under 18	448
Number of pregnant girls under 18	546
Number of pregnant women over 18	13,432
Separated children	317
Single-female headed households	7,233
Single-male headed households	3,240
Unaccompanied children	129
Single-child headed households	122
Grand Total	69,956

DISPLACEMENT TRACKING MATRIX (DTM) OROMIA REGION ETHIOPIA

ROUND 17: May/June 2019

ABOUT DTM

DTM GLOBAL

The Displacement Tracking Matrix (DTM) is a system to track and monitor displacement and population mobility. It is designed to regularly and systematically capture, process and disseminate information to provide a better understanding of the movements and evolving needs of displaced populations, whether on site or en route. More information is available at www.globaldtm.info.

DTM IN ETHIOPIA

In Ethiopia, data is collected at zone, woreda and site level. Since September 2016, 17 rounds of assessments have been completed. The DTM programme is implemented in close collaboration with the National Disaster Risk Management Commission, regional, zonal and woreda counterparts.

METHODOLOGY

IOM's DTM team composed of enumerators from IOM and DRC were deployed across the country to collect the data. The process involved the following steps:

Zone level: Interviews with key informants from the Disaster Prevention and Preparedness Office (DPPO), community representatives, and the education and health offices collect information including (among others) estimated caseload of displaced population, identification of woredas within the zone that host displaced populations, reason for displacement, time of arrival of IDPs and location of origin.

Woreda level: Information is collected from key woreda informants and includes (among others) estimated length of stay, number of displaced households and individuals at woreda level, displaced population by type of temporary settlements and approximate locations of identifiable displacement sites. The information is used to plan site assessments.

Site assessments: In-depth IDP site assessments capture detailed information through key informant interviews, direct observation and focus group discussions with male, female, elderly, children and IDP representatives.

Data on available services by sector, accessibility constraints, exact type, location and name of the site, place of origin of IDPs, estimated size and type of the site and most common type of shelter are captured. Age and gender disaggregation for the site is extrapolated using a demographic calculator tool based on the age range and sex of the household members of 20 randomly selected households from the site.

Disclaimer: Age and gender disaggregation for the site is extrapolated using a demographic calculator tool based on the age range and sex of the household members of 20 randomly selected households from the site.

Displacement Tracking Matrix (DTM) conducted in collaboration with Danish Refugee Council (DRC)

DTM made possible thanks to the European Civil Protection and Humanitarian Aid Operations (ECHO), the Ethiopian Humanitarian Fund (EHF), the Office of United States Foreign Disaster Assistance (OFDA) and the Swiss agency for Development and Cooperation (SDC).

The opinions expressed in this report are those of the authors and do not necessarily reflect the views of the Office of United States Foreign Disaster Assistance.
