Flow monitoring points are placed at known migrant passing points along the Niger migratory route. Data is collected daily at FMPs to inform migrant movements and profiles. The data collected provides a snapshot of migrant movements through the region. The numbers are collected from primary sources and do not claim to reflect all migrants passing through the flow monitoring points.

**TOTAL N° OF MIGRANTS REGISTERED AT FMP SINCE 01/02/2016**

| TOTAL OUTGOING MIGRANTS | 9060 |
| TOTAL INCOMING MIGRANTS | 3812 |

### OUTGOING

- **• flow from Niger**
  - **2012**
    - This week: 2517
    - Previous week: Unknown

### INCOMING

- **• flow to Niger**
  - 1095
    - This week: 1229
    - Previous week: Unknown

- **AM****: 226
- **UAM****: 0

### NOTES & SOURCES

* The report has been consolidated with the latest information verified hence differences with previous reports may arise.
** AM refers to accompanied minor. UAM refers to unaccompanied minor.
*** Sources include authorities, civil society and direct observation/interviews with passing migrants. As such nationality numbers are not independently verifiable and are not included.

### FUNDING

Data collection at the flow monitoring points is made possible by funding from the European Union and the Department for International Development (DFID).

SEGUEDINE - FLOW MONITORING POINT 1

Séguédine is one of the northernmost towns in Niger, over 600 km from Agadez and 300 km from Libya. Due to increased insecurity in the region, government authorities have regulated migrant convoy departures. The outgoing migrant convoys leave Agadez on Mondays, to pass through Séguédine between Tuesday and Thursday and then they arrive in Libya on Fridays. The following week, the same vehicles drive the same route in reverse and reach Agadez on Fridays on their way back. This regular route is operated on a weekly basis by a fleet of pick-up, 4 wheel drive vehicles and large 10 wheel trucks.

ROUTE USED TO AND FROM SEGUEDINE

Route 1
- Agadez (Niger)
- Séguédine (Niger)
- Gatroun (Libya)

Route 2 (not currently analysed by IOM)
- Diffa Region (Niger)
- Séguédine (Niger)
- Gatroun (Libya)

Overall recorded presence of minors at the FMP

| Accompanied Minor | 15
| Unaccompanied Minor | 134 |

Main nationalities* recorded at the FMP

Outgoing Flow:
1) Niger
2) Nigeria, Ghana
3) Senegal, Ghana

ARLIT - FLOW MONITORING POINT 2

Arlit is located 230 km north of Agadez, on the main road between Agadez and the Algerian city of Tamanrasset. The town grew around the uranium mining industry and serves as a rest point for movements between Algeria and Niger. Nigerian migrants that are convoyed from Algeria back to Niger also travel through Arlit before reaching the IOM transit center in Agadez. As such many of the migrants returning to Niger from Algeria do so in a repatriated rather than voluntary fashion.

ROUTE USED TO AND FROM ARLIT

Route 1
- Agadez (Niger)
- Arlit (Niger)
- Assamaka (Niger)
- In Guezzam (Algeria)
- Tchintabaraden (Niger)
- In Gall (Niger)
- Assamaka (Niger)
- In Guezzam (Algeria)
