IOM manages the Displacement Tracking Matrix (DTM) in Nigeria and other countries round the world to support humanitarian communities with data on displacement and mobility. This information management product determines the status, locations, and needs of people displaced by the ongoing conflict in Northeast Nigeria. As of 18 April 2018, the DTM has identified 1,881,198 IDPs (357,016 households) across Adamawa, Bauchi, Borno, Gombe, Taraba, and Yobe States. This represents an increase of 6 per cent (98,708 individuals) from the previous DTM Round. The increase in the identified number of IDPs is attributable to the arrival of Nigerians from neighboring countries into situations of secondary displacement, as well as communal clashes and population movement on account of military operations.
