Displacement from multiple locations in the vicinity of Mboro

Data Collection: 13<sup>th</sup> November 2018

## Background

Internally displaced persons (IDPs) that have recently fled to Wau Town and sought refuge in Lokoloko site as a result of conflict indicate that they have traveled from areas such as Ngoku, Togotivim, Mboro, Ngoalima, Ngokure and Ngodakala. Transport to and from the town has been limited as travel routes have become insecure, and IDPs have resorted to traveling by foot to reach IDP site and host community settings. Local churches and humanitarian partners have been able to provide some support to certain locations in Wau, including protection, medical care and water. However, IDPs in Lokoloko indicates that further support is needed.
