Regional Flow Monitoring Network

Reporting Period
November - December 2018

Active Flow Monitoring Network
Libya  89 FMPs
Sudan           4 FMPs
Yemen  6 FMPs
99 FMPs are currently active in three countries in the region.

As of the last report (November-December 2018) IOM identified at least 663,445 migrants currently in Libya. Migrants were identified in 100 municipalities within 571 communities originating from more than 44 countries [primarily from Niger (20%), Egypt (15%) and Chad (14%)]. Information on current migration flows was collected through 1,136 assessments in 15 regions and 29 municipalities. Migrants were primarily located in Tripoli (22%), Ejdabia (11%) and Misrata (10%).

The top 5 nationalities identified were Nigerien (19%), Egyptian (14%), Chadian (14%), Sudanese (12%) and Nigerian (10%).

Out of the total number of migrants identified, 623,529 individuals (94%) originated from 33 different African countries and 39,629 individuals (6%) from 10 Asian and Middle Eastern countries. The remaining 297 individuals were recorded with unknown/other country of origin. Out of the 633,655 individuals from Africa, 434,391 (70%) originated from Sub-Saharan countries and 189,138 individuals (30%) from North African countries.

While 21 per cent of African migrants were identified in the South of the country, few Asian and Middle-Eastern migrants were present there; only one per cent of Asian and Middle Eastern migrants in Libya were identified in Southern Libya.

Through its IOM Maritime Incidents tracking activities, DTM provides updates on the number of maritime incidents off the Libyan coast, as well as the latest figures on Italy arrivals and recorded deaths along the Central Mediterranean Route. In January 2019, 548 individuals were returned by the Libyan coast guard and 25 bodies were retrieved. This brings the total number of people returned to the Libyan Coast by the coast guards since the beginning of 2018 to 15,976, while 483 deaths were recorded along the Central Mediterranean Route; in January 2019 alone, 147 migrants lost their lives.

Since July 2017, IOM in Sudan has monitored returns of Sudanese migrants from the Kingdom of Saudi Arabia (KSA). The returns are monitored at the entry points of Khartoum International Airport (KRT) in Khartoum and at the port of Sawakin in Port Sudan state. IOM DTM teams, jointly with the Secretariat of Sudanese Working Abroad (SSWA), register Sudanese nationals returning via these entry points. In January 2019, 1,290 Sudanese nationals returned (90% arrived through KRT). Since the beginning of 2018, a total of 43,684 Sudanese migrants returning from KSA have been registered, 92 per cent of whom were registered at Khartoum International Airport. Sixty-eight per cent of the returnees were identified as men, whereas 32 per cent were
women. More than half of the registered returnees (60%) were of working age (18 to 59 years), and 22 per cent were school age children.

From January 2018 to January 2019, 16,809 Sudanese migrants were identified at the Abyei flow monitoring point crossing the border from Sudan.

The majority of migrants observed in January were Ethiopian nationals (91% or 13,932 individuals). Arrivals of Ethiopian nationals in January increased by 45 per cent from the 7,689 in December 2018 in the proportion of migrants who intended to stay in Yemen.

Since November 2017, DTM Yemen has been tracking returns from the Kingdom of Saudi Arabia through a border Flow Monitoring Point in Al Wadea’a, Hadramaut Governorate. In January 2019, 5,107 individuals returned to Yemen.

DTM Iraq is currently collecting and processing data for round 108, and the results will be published and disseminated accordingly.

As of 31 December 2018, DTM identified 1,802,832 IDPs (300,472 families) who were displaced after January 2014, dispersed across 18 governorates, 108 districts and 3,214 locations in Iraq. For the same period, DTM also identified 4,165,320 returnees (694,220 families) across 8 governorates, 33 districts and 1,578 locations.

An additional 51,696 returnees were recorded during round 107 (an increase of 1% since October). Most returned to three governorates: Nineawa (22,416 individuals), Salah al-Din (14,976) and Anbar (7,314). For the same period, DTM recorded a decrease of 63,762 IDPs across all governorates (a decrease of 4% since October) except Sulaymaniya. The top three governorates being: Salah al-Din (14,268, -10%), Dahuk (9,636, -3%) and Anbar (9,390, -15%).

In Round 23, the number of identified IDPs in Libya decreased from 187,423 individuals to 170,040 individuals. In Yefren and Tarhuna districts the numbers of IDPs decreased by 93 per cent and 73 per cent respectively. The number of IDPs reported in round 23 represents a nine per cent decrease compared to the previous round in September and October 2018.

A large portion of IDPs (40%) were identified in the west of Libya, followed by 32 per cent in the east of the country and 27 per cent identified in the south of the country. The highest IDP presence was reported in Benghazi (26,865 individuals) followed by Sebha (21,005 individuals).

The number of identified returnees in Libya increased from 403,978 to 445,845 individuals (10%). This increase can mostly be attributed to the return of previously displaced persons to Tripoli who had left their homes during the September clashes and due to returns to Derna. At least 6,985 previously displaced families returned to Derna and 31 families to surrounding areas in the second half of 2018.

The majority of returning IDPs (51%) were identified in the east of Libya, followed by 42 per cent in the west while the remaining seven per cent were identified to have returned to their places of origin in the south. Benghazi had the highest number of returnees (188,625 individuals) followed by Sirt with 75,860 individuals.

Libya

Current Implementation Round
Round 24 (January - February 2019)

Latest count of populations tracked and monitored
As of Round 23 – November-December 2018
170,040 Internally Displaced
445,845 Returnees

Implementation Component
Mobility Tracking (Baseline), Survey, Event Tracking

Current Geographical Coverage
Country-wide

DTM Sudan is currently processing and analyzing 2018 data, and the results will be published and disseminated in a yearly report when available.

In August 2018, DTM Sudan published a Monthly Report presenting the findings from its tracking and registration activities, which targeted new IDPs from East Jabal Marra in South Darfur, returnees from South Darfur in Liaba, and IDPs and returnees in Bel el Sherif in South Darfur. Over the course of that month, 50,985 individuals were registered.

Yemen

Current Implementation Round
February 2019

Latest count of populations tracked and monitored
As of Round 32 - June 2018
2,331,264 Internally Displaced
1,012,464 Returnees

Implementation Component
Mobility Tracking (Baseline), Emergency Tracking

Current Geographical Coverage
333 districts in 22 Governorates

DTM Yemen completed Round 32 of its Mobility Tracking Baseline Area Assessments in June 2018 in the nine governorates in which they had continuous direct access and published the 17th Task Force on Population Movement (TFPM) report. The report compiled data from DTM area assessments and the latest available numbers from the National Authorities and partners on the ground to create a country wide picture of displacement in the country from January to June 2018.

From 23 October to 6 November 2018, IOM Yemen identified an increase of 1,454 households displaced from Al Hudaydah bringing the total number of displaced households to 75,840 (an estimated 532,830 individuals) forced to leave their homes since the escalation of conflict in early June. The largest increases have been seen in the Al Hudaydah and Abyan Governorates.

Emergency tracking remains in place to collect figures on displacement events that occur in between DTM rounds.

* * *
In Round 28, 176,046 IDPs and 443,845 IDPs Returns were identified in Libya country-wide.
