IOM’s Displacement Tracking Matrix assessed three locations in Kuarjena, Jur River of Western Bahr el Ghazal following recent clashes between pastoralists and farmers. The unrest resulted in the displacement of 9,672 individuals who fled Akau, Werbet and Madhon (all within Kuarjena area). At the time of assessment, IDPs continued to arrive at a spontaneous settlement in Akwo as well as within host community settings in Kuarjena Village and Mapel (all within Kuarjena). Humanitarian assistance was not yet in place at the time of assessment, however, joint CCCM and Protection Cluster assessments are reportedly planned for the coming week.

IOM DTM employs Event Tracking as a more rapid and localized assessment tool complementing overall efforts to report on IDP and returnee figures nationally (see Mobility Tracking round 4 reports and maps on displacement.iom.int/south-sudan). IOM teams access IDP / returnee locations and consult local key informants including community representatives, local authorities or humanitarian partners and triangulate findings to provide partners with the most accurate as possible, actionable and current data.
