Displacement overview

- **272,478** Individuals
- **59,761** Households
- **204** Locations assessed
- **160** sites and 44 host communities

### Demographic profile

- **99%** of households have children
- **7%** of families are elderly (**60** years old or more)
- **63%** of families are minors
- **6** Average household size

Demographic data were collected at the household level through a demographic calculator with a sample of 1,714 households.

### Context and methodology

For more than five years, Chad and other countries of the Lake Chad Basin (Cameroon, Niger and Nigeria) have been the targets of attacks by armed groups that have caused significant internal and cross-border population displacements. In Chad, IOM is using the Displacement Tracking Matrix (DTM) since May 2015 in the Lac Province to gather updated information on the number, profiles and needs of populations displaced due to this crisis, in order to inform humanitarian and development programmes. Data is collected from key informants at the villages and sites hosting displaced populations. This dashboard presents key results from Round 10 of DTM assessments carried out between 15 January and 26 February 2020 in 204 displacement locations. **During data collection, a 23 per cent increase in the number of displaced persons was observed compared to the previous round.** This increase results from the rise in the frequency of attacks by Non-State Armed Groups. It is also explained by the expansion of the geographic coverage of DTM assessments during this round (204 assessed locations during this round, compared to 184 during Round 9).

### Displaced populations

- **208,382** Internally Displaced Persons (IDPs)
- **33,602** Returnees from abroad
- **24,630** Returnees – Former IDPs
- **5,864** Third Country Nationals (TCNs)

The map is for illustrative purposes only. Representations and the use of boundaries and geographical names on this map may include errors and do not imply judgment of the legal status of territories, nor official recognition or acceptance of these boundaries by IOM. Geographic coordinates of villages and sites were collected during field assessments. However, some locations, especially those of the sous-préfecture of Kaiga-Kindjiria, were evaluated remotely due to security reasons.

### Location of displaced persons

- **81%** of displaced persons live in displacement sites
- **19%** of displaced persons live in host communities

### Shelter types

- **26%** - Straw/Sheets
- **7%** - Solid walls
- **97%** - No shelter

---

Data collection: January – February 2020 | Round 10
Publication Date: March 2020
This map is for illustrative purposes only. Representations and the use of boundaries and geographical names on this map may include errors and do not imply judgment of the legal status of a territory, nor official recognition or acceptance of these boundaries by IOM. Geographic coordinates of villages and sites were collected during field assessments. However, some locations, especially those of the sous-prefecture of Kaiga-Kindjiria, were evaluated remotely due to security reasons.

### Priority needs of displaced population

- **Food**: 35%
- **Cash**: 11%
- **Non Food Items**: 8%
- **Education**: 6%
- **Shelter**: 5%
- **Work / Livelihood**: 10%
- **Water**: 11%
- **Health services**: 14%

### Walking distance to nearest health service

- **Less than 15 minutes**: 14%
- **15 to 30 minutes**: 36%
- **More than 50 minutes**: 50%
- **No access**: 7%

### Most common health problems

- **Malaria**: 36%
- **Stomach ache**: 21%
- **Cough**: 14%
- **Diarrhea**: 14%
- **Headache**: 6%
- **Fever**: 5%
- **Signs of malnutrition**: 4%

### Evolution of the number of displaced persons over the five previous DTM assessments

- **Round 6**: 126,313
- **Round 7**: 130,472
- **Round 8**: 133,338
- **Round 9**: 169,003
- **Round 10**: 208,382

- **Round 6** to **Round 10**: +23%
- **Round 7** to **Round 10**: +27%
- **Round 8** to **Round 10**: +27%
- **Round 9** to **Round 10**: +23%
- **Round 10**: +23%

### Presence of health services in assessed locations

- **On-site**: 75%
- **Off-site**: 25%

### Type of available health services

- Mobile clinics: 52%
- Health centres: 43%
- Hospitals: 3%
- Private clinics: 2%
