Context and methodology

For more than 5 years, Chad and others countries of the Lake Tchad Basin have been the targets of attacks by armed groups that have caused internal and cross-border population displacements. In Chad, IOM is implementing the Displacement Tracking Matrix since May 2015 in the Lac province to gather updates on the number and needs of displaced populations due to this crisis, in order to guide humanitarian and development programs. Data are collected from key informants in villages and sites hosting these people. This dashboard presents results of evaluations carried out between August and September 2019 in 184 locations.

Displaced populations

- **169,003** Internally Displaced Persons (IDPs)
- **47,364** Returnees
- **5,652** Third Country Nationals (TCNs)

Localisation of displaced persons

This map is for illustrative purposes only. Representations and the use of boundaries and geographical names on this map may include errors and do not imply judgment of the legal status of a territory, nor official recognition or acceptance of these boundaries by IOM. Geographic coordinates of villages and sites were collected during field assessments. However, some locations, especially those of the sous-prefecture of Kaiga-kindjiria, were evaluated remotely due to security reasons in particular.
