

CONTEXT

Tawerghan IDPs are facing multiple challenges that continue to prevent them from returning to their homes.

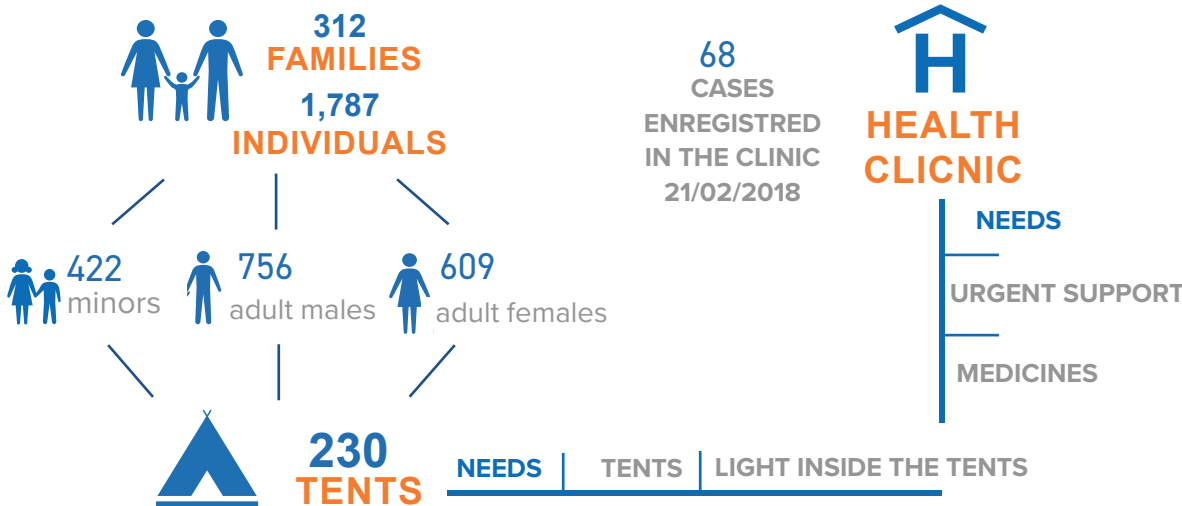

School holidays have been underway since the 23rd February, resulting in a consistent increase in the number of IDPs in the camps.

Tents in the camps are not able to protect IDPs from rain or cold due to extreme weather conditions. 14 tents in Qararat Al-Katf camp were damaged during the night of the 22nd of February, with some others destroyed earlier in the week.

Compared to the number of families in the camps, the number of tents remains insufficient.
