After the outbreak of the civil war in 1991, parts of Afgooye town became a place of refuge for many of Southern Somalia’s internally displaced people. The region has become home for many displaced persons from Lower Shabelle, with some also arriving from Bay and Hiraan. DTM estimated over 30,000 IDPs in Afgooye, with over half of all sites less than 6 months old. Since May 2017, DTM Somalia has rolled out its Emergency Tracking Tools (ETT) to have a better grasp of where IDP communities live, their numbers and priority needs. The geo-referenced dataset will contribute to an inter-agency Master-list of IDP sites.

32,620

Number of IDPs (rounded estimates)

Data collection was conducted between 18th August and 18th September 2017 through key informant interviews.
