

The DTM Emergency Event Tracking (EET) is deployed to track sudden displacement and population movements, provide more frequent updates on the scale of displacement and quantify the affected population when needed. As a subcomponent of the new Mobility Tracking methodology in Sudan ([Round one](#)), and activated on a need basis, EET utilises a broad network of key informants to capture best estimates of the affected population presence per location – a useful tool for humanitarian response planning and design.

Event Overview

DTM teams activated EET to monitor the displacement of individuals affected by the ongoing violent clashes between Arab and Masalit tribesmen in Ag Geneina city, West Darfur, since 19 July 2020. Affected populations were displaced from the Aljabaal area of Ag Geneina city, following approximately 75 homes being burnt down and 16 homes looted. The first EET update estimates a total number of 433 individuals (91 households) dispersed in and around the area, 69 per cent of whom are sheltering in community accommodation. At least 54 individuals (12%) report additional vulnerabilities in need of assistance and support.

IOM DISCLAIMER

The opinions expressed in the report are those of the authors and do not necessarily reflect the views of the International Organization for Migration (IOM). The designations employed and the presentation of material throughout the report do not imply the expression of any opinion whatsoever on the part of IOM concerning the legal status of any country, territory, city or area, or of its authorities, or concerning its frontiers or boundaries.

IOM is committed to the principle that humane and orderly migration benefits migrants and society. As an intergovernmental organization, IOM acts with its partners in the international community to: assist in the meeting of operational challenges of migration; advance understanding of migration issues; encourage social and economic development through migration; and uphold the human dignity and well-being of migrants.
