

EMERGENCY EVENT TRACKING

Data collection: 4 May 2020

CONFLICT

The DTM Emergency Event Tracking (EET) is deployed to track sudden displacement and population movements, provide more frequent updates on the scale of displacement and quantify the affected population when needed. As a subcomponent of the new Mobility Tracking methodology in Sudan ([Round One](#)), and activated on a need basis, EET utilises a broad network of key informants to capture best estimates of the affected population presence per location – a useful tool for humanitarian response planning and design.

Event Overview

DTM teams activated EET to monitor the displacement of individuals affected by violent clashes between an armed militia and the Fur tribe in As Salam locality, South Darfur. Clashes erupted on 23 April 2021 across multiple villages to the west of Nyala town, namely, Gussa Jammat, Mansoura, Sersera, Bilili, Miro Kabar, Habanya and Dambo Dambo. Most of these villages have been burned down. The affected population have fled to Kalma IDP camp, where they were previously displaced during last year's rainy season. With the suspension of humanitarian operations due to security concerns until 2 May, DTM teams visited Kalma IDP camp as soon as the situation allowed to gather initial data and produce this first update.

The first update estimates a total number of 625 individuals (125 households) displaced in Kalma IDP camp in Beliel locality and seeking shelter with the host community. All individuals are Sudanese nationals. Reports indicate that five individuals have been killed and three sustained injuries, whilst all displaced households have lost personal belongings and livestock. At least 52 individuals (8%) report additional vulnerabilities in need of assistance and support. Based on a ranking scale, the three main priority needs identified are food, emergency shelter and non-food items.

Demographics

Priority Needs

(Ranking scale)

Vulnerabilities

Return Intention

Data collected through the return intention indicator suggests that all displaced households (100%) intend to return to their locations of origin upon improvement of the security situation.

Shelter Indicator

All IDP households (100%) are staying with the host community in Kalma IDP camp.

IOM DISCLAIMER

The opinions expressed in the report are those of the authors and do not necessarily reflect the views of the International Organization for Migration (IOM). The designations employed and the presentation of material throughout the report do not imply the expression of any opinion whatsoever on the part of IOM concerning the legal status of any country, territory, city or area, or of its authorities, or concerning its frontiers or boundaries.

IOM is committed to the principle that humane and orderly migration benefits migrants and society. As an intergovernmental organization, IOM acts with its partners in the international community to: assist in the meeting of operational challenges of migration; advance understanding of migration issues; encourage social and economic development through migration; and uphold the human dignity and well-being of migrants.
