The DTM Emergency Event Tracking (EET) is deployed to track sudden displacement and population movements, provide more frequent updates on the scale of displacement and quantify the affected population when needed. As a subcomponent of the new Mobility Tracking methodology in Sudan (Round One), and activated on a need basis, EET utilises a broad network of key informants to capture best estimates of the affected population presence per location – a useful tool for humanitarian response planning and design.

DTM teams activated EET to monitor the situation of individuals affected by the heavy rains across Khartoum state since mid-July, which caused flooding and destruction of infrastructure, houses and livelihoods. Overall, the first EET update estimates a total of 31,743 individuals (6,340 households) affected across the six localities of Khartoum, Bahri, Jebel Awlia, Um Durman, Karrari and Sharg an Neel. Field teams report an estimated 2,592 individuals (513 households) affected across five locations assessed in Khartoum locality, 8,655 individuals (1,909 households) affected across nine locations assessed in Bahri locality, 8,906 individuals (1,625 households) affected across eleven locations assessed in Jebel Awlia locality, 10,810 individuals (2,137 households) affected across three locations assessed in Sharg an Neel locality and 780 individuals (156 households) affected across two locations assessed in Um Durman and Karrari localities. Out of the total affected caseload, an estimated 44 per cent (13,979 individuals) are displaced. Data collection across the six localities is ongoing and numbers are expected to increase in the second report which will cover an additional 26 affected sites.

**HIGHLIGHTS**

**Affected Population**
- 31,743 Individuals
- 6,340 Households
- 1,578 Sudanese
- 30,165 Non-Sudanese

**Internally Displaced Persons**
- 13,979 Individuals
- 2,854 Households

**Houses Damaged**
- 2,787 Partially damaged
- 2,520 Completely destroyed

**Casualties**
- 299 Injuries
- 8 Deaths

**Event Overview**

DTM teams activated EET to monitor the situation of individuals affected by the heavy rains across Khartoum state since mid-July, which caused flooding and destruction of infrastructure, houses and livelihoods. Overall, the first EET update estimates a total of 31,743 individuals (6,340 households) affected across the six localities of Khartoum, Bahri, Jebel Awlia, Um Durman, Karrari and Sharg an Neel. Field teams report an estimated 2,592 individuals (513 households) affected across five locations assessed in Khartoum locality, 8,655 individuals (1,909 households) affected across nine locations assessed in Bahri locality, 8,906 individuals (1,625 households) affected across eleven locations assessed in Jebel Awlia locality, 10,810 individuals (2,137 households) affected across three locations assessed in Sharg an Neel locality and 780 individuals (156 households) affected across two locations assessed in Um Durman and Karrari localities. Out of the total affected caseload, an estimated 44 per cent (13,979 individuals) are displaced. Data collection across the six localities is ongoing and numbers are expected to increase in the second report which will cover an additional 26 affected sites.

Total number of IDPs, Sudanese and Non-Sudanese flood-affected individuals per locality within Khartoum State.
Data collected through the return intention indicator suggests that the majority of affected households (80%) intend to remain in the same place, whilst 20 per cent intend to move to a new location. An estimated total of 2,592 individuals (513 households) are affected, of which 1,877 individuals (370 households) are currently displaced in five locations (ten sites) across Khartoum locality. Approximately 337 homes have been destroyed and 176 partially damaged by the floods. Two deaths have been reported, and a further 30 individuals reportedly injured. Twenty-five individuals have indicated their household goods and/or livestock to be lost. At least 393 individuals (15%) report additional vulnerabilities in need of assistance and support. Based on a ranking scale, the three main priority needs identified are emergency shelter, non-food items and food. Emergency shelter was the most critical need in all locations affected, except for Tuti island where water, sanitation and hygiene (WASH) were identified as the highest priority. Overall, non-food items are the second most reported need, followed by food in three sites (Al Hara 5, Alremaiyla and the industrial area of Khartoum) and healthcare in two sites (Tuti island and Allamab Bahr Abiad). Field reports further indicate the urgent need for pesticides to be provided in Al-Jerif West Al-Sheta. Most of the flood-affected households (33%) are gathering in open areas, whilst 19 per cent are sheltering in schools or other public buildings, 11 per cent in critical shelters and eight per cent are staying with the host community. Less than one per cent of affected households are renting accommodation and 28 per cent have remained in their own homes. The affected population in the industrial area of Khartoum are sheltering without coverage, and field teams indicate the urgency for emergency shelters to be provided.
Data collected through the return intention indicator suggests that the majority of affected households (50%) intend to remain in the same place, whilst 40 per cent intend to move to a new location and ten per cent intend to return to their location of origin.
Overview

An estimated total of 8,906 individuals (1,625 households) are affected, of which 2,414 individuals (494 households) are currently displaced in eleven locations (18 sites) across Jabel Awlia locality. Approximately 563 homes have been destroyed and 782 partially damaged by the floods. Three deaths have been reported, and a further 93 individuals reportedly injured. Approximately 16 individuals have indicated their household goods and/or livestock to be lost. At least 361 individuals (4%) report additional vulnerabilities in need of assistance and support. Based on a ranking scale, the three main priority needs identified are emergency shelter, non-food items and health (medical needs).

Return Intention

Data collected through the return intention indicator suggests that the majority of affected households (75%) intend to return to their location of origin, whilst 25 per cent intend to move to a new location.

Priority needs

Ranking scale

1. Emergency shelter
2. Non-food items
3. Health (medical needs)
4. Food
5. Education
6. Nutrition
7. Waste management
8. WASH

Emergency shelter and non-food items were highly prioritised in most locations affected, followed by health (medical needs), food, WASH and waste management. On average, nutrition and educational needs were lower on the list of priorities. Field teams report the urgent need for mosquito nets, blankets and antibiotics to be distributed.

Overview

An estimated total of 780 individuals (156 households) are affected, of which 128 individuals (25 households) are currently displaced in the two assessed locations (3 sites) across Um Durman and Karrari. Approximately 16 homes have been destroyed and 75 partially damaged by the floods. One individual has been reportedly injured and two individuals have indicated their household goods and/or livestock to be lost. At least 67 individuals (9%) report additional vulnerabilities in need of assistance and support. Based on a ranking scale, the three main priority needs identified are WASH, emergency shelter and non-food items.

Vulnerabilities

- 36 Chronic Diseases
- 10 Lactating Women
- 8 Pregancy
- 5 Physical Disabilities
- 5 Mental Illnesses
- 3 Unaccompanied Elders

Return Intention

Data collected through the return intention indicator suggests that all of the displaced households (100%) intend to return to their locations of origin, while all of the affected households (100%) intend to remain in the same place.

WASH and emergency shelter were highly prioritised in both locations affected, followed by non-food items, health (medical needs), food and waste management. On average, nutrition and educational needs were lower on the list of priorities. Field teams report the urgent need for tents, particularly in Abroof where residents remain sheltered inside homes at risk of collapsing. Additional needs indicated are mosquito nets and latrines.

Overview

Most of the flood-affected households (60%) are staying with the host community, whilst 26 per cent have remained in their own homes and 13 per cent are sheltering in schools or other public areas.
**Overview**

An estimated total of 10,810 individuals (2,137 households) are affected, of which 1,650 individuals (301 households) are currently displaced in three locations (13 sites) across Sharg An Neel locality. Approximately 266 homes have been destroyed and 1,371 partially damaged by the floods. Two deaths have been reported, and a further 27 individuals reportedly injured. Approximately 55 individuals have indicated their household goods and/or livestock to be lost. At least 980 individuals (9%) report additional vulnerabilities in need of assistance and support. Based on a ranking scale, the three main priority needs identified are WASH, emergency shelter and non-food items.

**Return Intention**

Data collected through the return intention indicator suggests that the majority of affected households (66%) intend to remain in the same place, while 34 per cent of the caseload that were displaced intend to return to their locations of origin.

**Casualties**

- 27 Injuries
- 2 Deaths

**Houses Damaged**

- 1,371 Partially damaged
- 266 Completely destroyed

**Priority needs**

WASH and emergency shelter were highly prioritised in most locations affected, followed by non-food items, health (medical needs), food and waste management. On average, nutrition and educational needs were lower on the list of priorities. Field teams report the urgent need for latrines and antibiotics to be distributed across the three assessed locations.

**Vulnerabilities**

- 530 Children under 5 years
- 182 Low-income
- 100 People with disabilities
- 74 Pregnant
- 62 Senior persons
- 12 Orphans
- 12 Vulnerable population
- 8 Brides providing care on households

**HIGHLIGHTS**
