Following the passage of Hurricane Matthew over Haiti on 4 October 2016, IOM Haiti has launched its Displacement Tracking Matrix process. As part of this process, IOM teams have assessed evacuation shelters to compile overall shelter information. Full registration of these evacuation shelters is ongoing as well as data entry into IOM’s database for further analysis. This dashboard presents available data and will be updated on a regular basis.

**Shelter Assessments**

Shelters assessments in 172 Evacuation Shelters
- 8,184 Households
- 33,578 Individuals

**Available Registration Data (as of November 9th 2016)**
- 24 Evacuation Shelters
- 1,481 Households
- 6,797 Individuals

**Demographic Data**

- 52% Female
- 48% Male
