The IOM Iraq Displacement Tracking Matrix (DTM) is the standard data source being used in Iraq to guide the humanitarian response. Emergency tracking for the Mosul operations began identifying people displaced resulting from military actions that began on 17 October.

Find more information at the Mosul Data Portal: http://iraqdtm.iom.int/EmergencyTracking.aspx

The Emergency Tracking (ET) system is a crisis-based tool that aims at tracking sudden displacement or return movements triggered by specific crises. The ET figures reported on this portal are not cumulative of the all persons affected by the Mosul crisis thus far, rather the ET update provides only a snapshot of the current displacement situation for the indicated date. The data and information reported on this page are related solely to the displacement caused by the Mosul operations which started on 17 October 2016.

On 24 December:

- Approximately 15 families arrived to Qayyarah Jad’ah airstrip emergency camp from Markaz Mosul sub-district;
- Approximately 65 families arrived to Hasansham M2 (former Khazer M2) camp from Markaz Tilkaif and Markaz Mosul sub-districts;
- Approximately 182 families arrived to Qayyarah Jad’ah 3 camp.

*Emergency tracking numbers are not cumulative. They reflect a snapshot of displacement on the day of reporting. The number of individuals is calculated by multiplying the number of identified families by six, which is the average size of an Iraqi family.
