*The share of collapsed and in danger of collapse shelters in the figure above refers to IDP/returnee shelters only.*
Amiong the displaced and returnees, a large number are in need of support due to lack of food, lack of safety, and lack of livelihood.

The community is currently being led by a self-organized security provider.

The main concern for health is malaria, which is being handled by NGOs/INGOs.

Temporary Learning Spaces are the type of facility for education, with no availability of learning supplies and available teachers.

The special needs of the community include pregnant and breastfeeding women, separated, orphaned and unaccompanied children, persons with mental or physical disabilities, persons with chronic diseases or serious medical conditions, and old people without caregivers.

The location is accessible by other means of transport and a community leader is present.

Returnees have already been registered, and there are no plans for registration in the future.

The community is in need of support to return and restart their lives.
