The IOM Iraq Displacement Tracking Matrix (DTM) is the standard data source being used in Iraq to guide the humanitarian response. The DTM figures reported on this portal are not cumulative of all persons affected by the Mosul crisis thus far, rather the ET update provides only a snapshot of the current displacement situation for the indicated date. The data and information reported on this page are related solely to the displacement caused by the Mosul operations which started on 17 October 2016.

Find more information at the Mosul Data Portal: http://iraqdtm.iom.int/EmergencyTracking.aspx

On 7 January:
- Approximately 75 families arrived to Khazer M1 camp from Markaz Mosul sub-district;
- Approximately 60 families arrived to Haj Ali emergency site from Markaz Mosul sub-district;
- Approximately 79 families arrived to Nargizlia 1 camp.

*Emergency tracking numbers are not cumulative. They reflect a snapshot of displacement on the day of reporting. The number of individuals is calculated by multiplying the number of identified families by six, which is the average size of an Iraqi family.

The IOM Iraq Displacement Tracking Matrix (DTM) is the standard data source being used in Iraq to guide the humanitarian response. Emergency tracking for the Mosul operations began identifying people displaced resulting from military actions that began on 17 October.
